Calling Agent - Brian Tracy Publishing

Developed Voice Calling AI-Agent for Brian Tracy Publishing capable of speaking 5 languages with transcription, plus standalone version that handles call from telephony network

Link: <https://briantracypublishing.com/landingpage--co-author-page>

The screenshot shows the homepage of Brian Tracy Publishing. At the top left is the logo "BRIAN TRACY PUBLISHING". At the top right are links for "Our Proven System", "Who Is This For?", "About Brian Tracy", and "FAQ". Below the header is a promotional message: "For entrepreneurs who want to grow seriously" followed by "Make More Money with Brian Tracy" and "We help you attract more clients than ever before". A large video thumbnail features Brian Tracy sitting at a desk, with the word "UNIQUE" overlaid in large white letters. In the bottom right corner of the thumbnail is a blue button with a woman's profile picture and the text "Call Us Now" with a phone icon.

This screenshot shows the same landing page as above, but with a video overlay of Brian Tracy speaking. The video has a semi-transparent "STRENGTHEN YOUR BRAIN" watermark. To the right of the video is a call interface window titled "Brian-Tracy Publishing". The window shows a small video feed of a woman, a status bar indicating "Disconnected", a large empty circular area for a video call, a language selection dropdown set to "English", and a "Start call" button. The overall layout is clean and professional, designed for both web browsing and mobile devices.

Sales Coach AI Agent

Sales Coach AI agent is an agent that guide the sales representatives of the companies on how to increase the sales, talk with the prospects based on the companies Standard Operating Procedures. It has following features

1. Role based Access for Admins and Simple users management through admin panel
2. Admin panel to update the knowledge base of the agent
3. Option to modify the behavior of AI agent
4. Feedback Panel for managing feedbacks based continuous learning simulation (panel image confidential not included)

Sales Coach AI By Devinci Codes

AI Sales Coach Configuration
Configure how the AI Sales Coach behaves when interacting with sales representatives

Behavior Style: Casual
Define how the AI should behave when coaching sales representatives

Tone of Voice: Friendly and Helpful
Set the tone of voice used in AI responses

Number of Replies/Messages: 3
Number of alternative replies the AI will generate for each prompt

Additional Instructions
Respond in a warm, casual, and friendly tone, like chatting with a helpful friend who's easy to talk to. Don't write so many words, keep it as concise and natural as if you are direct messaging a friend. Limit the word count to 300 characters MAX but you don't need to use up 300 characters if you don't need to.

Optional special instructions or guidelines for the AI to follow

Sales Coach AI By Devinci Codes

Hi I would like to know more about how can i increase sales

Tips to Increase Sales

Follow Up with Existing Customers: Reach out to happy customers for repeat sales. They're easier to sell than new clients!

Build Relationships: Stay in touch with clients. Daily check-ins help build trust and loyalty.

Know Your Target Audience: Understand who your ideal customers are to focus your efforts effectively.

Engage in Conversations: When reaching out, start with friendly chats. Let them talk 80% of the time, and listen to their needs before pitching your product.

Be Consistent: Message 150-300 potential clients daily. The more you reach out, the more sales you'll generate!

Stay persistent, and you'll see results! 😊

Sales Coach AI By Devinci Codes

Write Correct Response

Original Question: Hi I would like to know more about how can i increase sales

AI Response:
Tips to Increase Sales 1. **Follow Up with Existing Customers**: Reach out to happy customers for repeat sales. They're easier to sell than new clients! 2. **Build Relationships**: Stay in touch with clients. Daily check-ins help build trust and loyalty. 3. **Know Your Target Audience**: Understand who your ideal customers are to focus your efforts effectively. 4. **Engage in Conversations**: When reaching out, start with friendly chats. Let them talk 80% of the time, and listen to their needs before pitching your product. 5. **Be Consistent**: Message 150-300 potential clients daily. The more you reach out, the more sales you'll generate! Stay persistent, and you'll see results! 😊

Your Correction: Write the correct response here...

Question 1/3 05:48

Multiple Choice

Which of the following best describes the method used to find the middle element of a linked list in one iteration?

- Using a hash map to store node addresses
- Using recursion to traverse the list
- Using slow and fast pointers moving at different speeds
- Using a doubly-linked list for easier traversal

Next >

Interve - Powered by DeVinci Codes

Quiz Results Overall Score: 33% 3/3

1 Which of the following best describes the method used to find the middle element of a linked list in one iteration? 0/100

Your Answer: Using recursion to traverse the list

Feedback: The correct method to find the middle element of a linked list in one iteration is by using slow and fast pointers, not recursion.

2 What is the time complexity of the algorithm used to detect and remove loops in the provided linked list code? 100/100

Your Answer: O(n)

Feedback: Correct. The algorithm detects and removes loops in O(n) time complexity.

A-Z Marketing Agent for complete automation (under production)

1. **Lead Generation:** High quality warm linkedIn Lead Generation, Google maps scraping
2. **Intelligent outreach:** User Profiling and intelligent outreach through cold emails, and cold calls
3. **Organic content creation:** Automated blogs and post creation and automated post creation and scheduling for social media (linkedIn, Instagram, Facebook etc).
4. **Automated Ads Creation and uploading:** Creates Ads for various social media platforms to increase traffic and warm leads

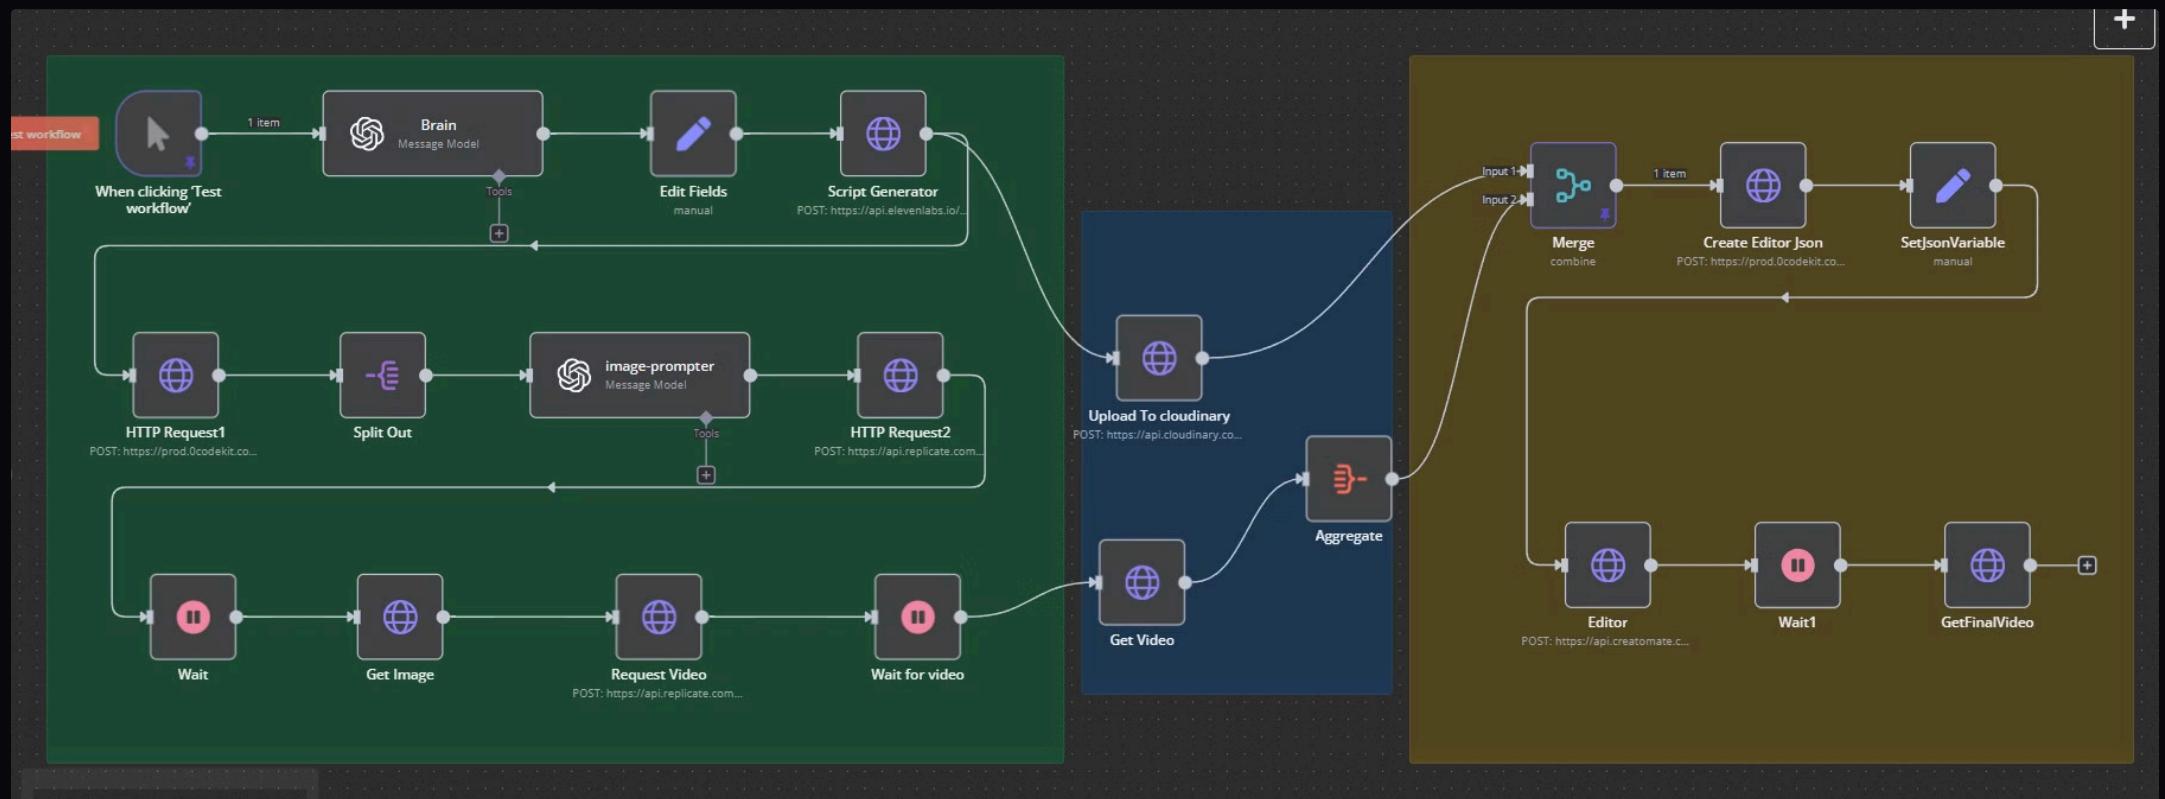

Generated lead sample:

https://docs.google.com/spreadsheets/d/1TCM9PLduUSHG7XE8JnPNr9Wk2S_5dTpJ183x5jn46Jc/edit?usp=sharing

Automated Video Creation Agent

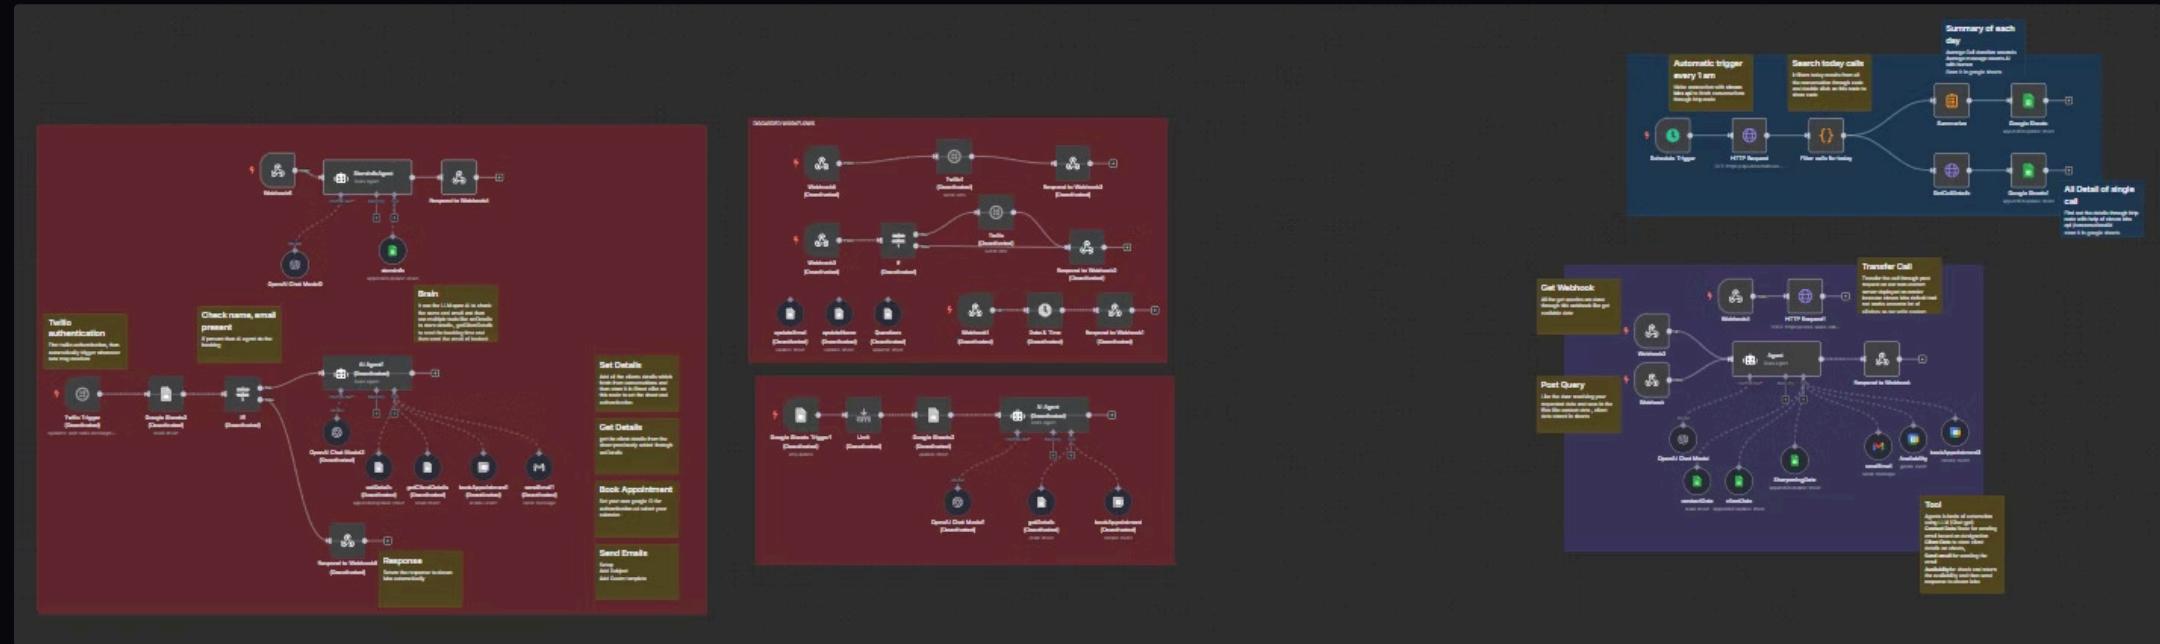

A complete autonomous agent that can create scripts for informative videos, generate audio, and sync them all together, and get a ready to upload video for social media, youtube etc.

Demo Video Link: https://drive.google.com/file/d/1BJ0g5wBNel9lCa8Dy3fo97rZVtkVxe_6/view?usp=sharing

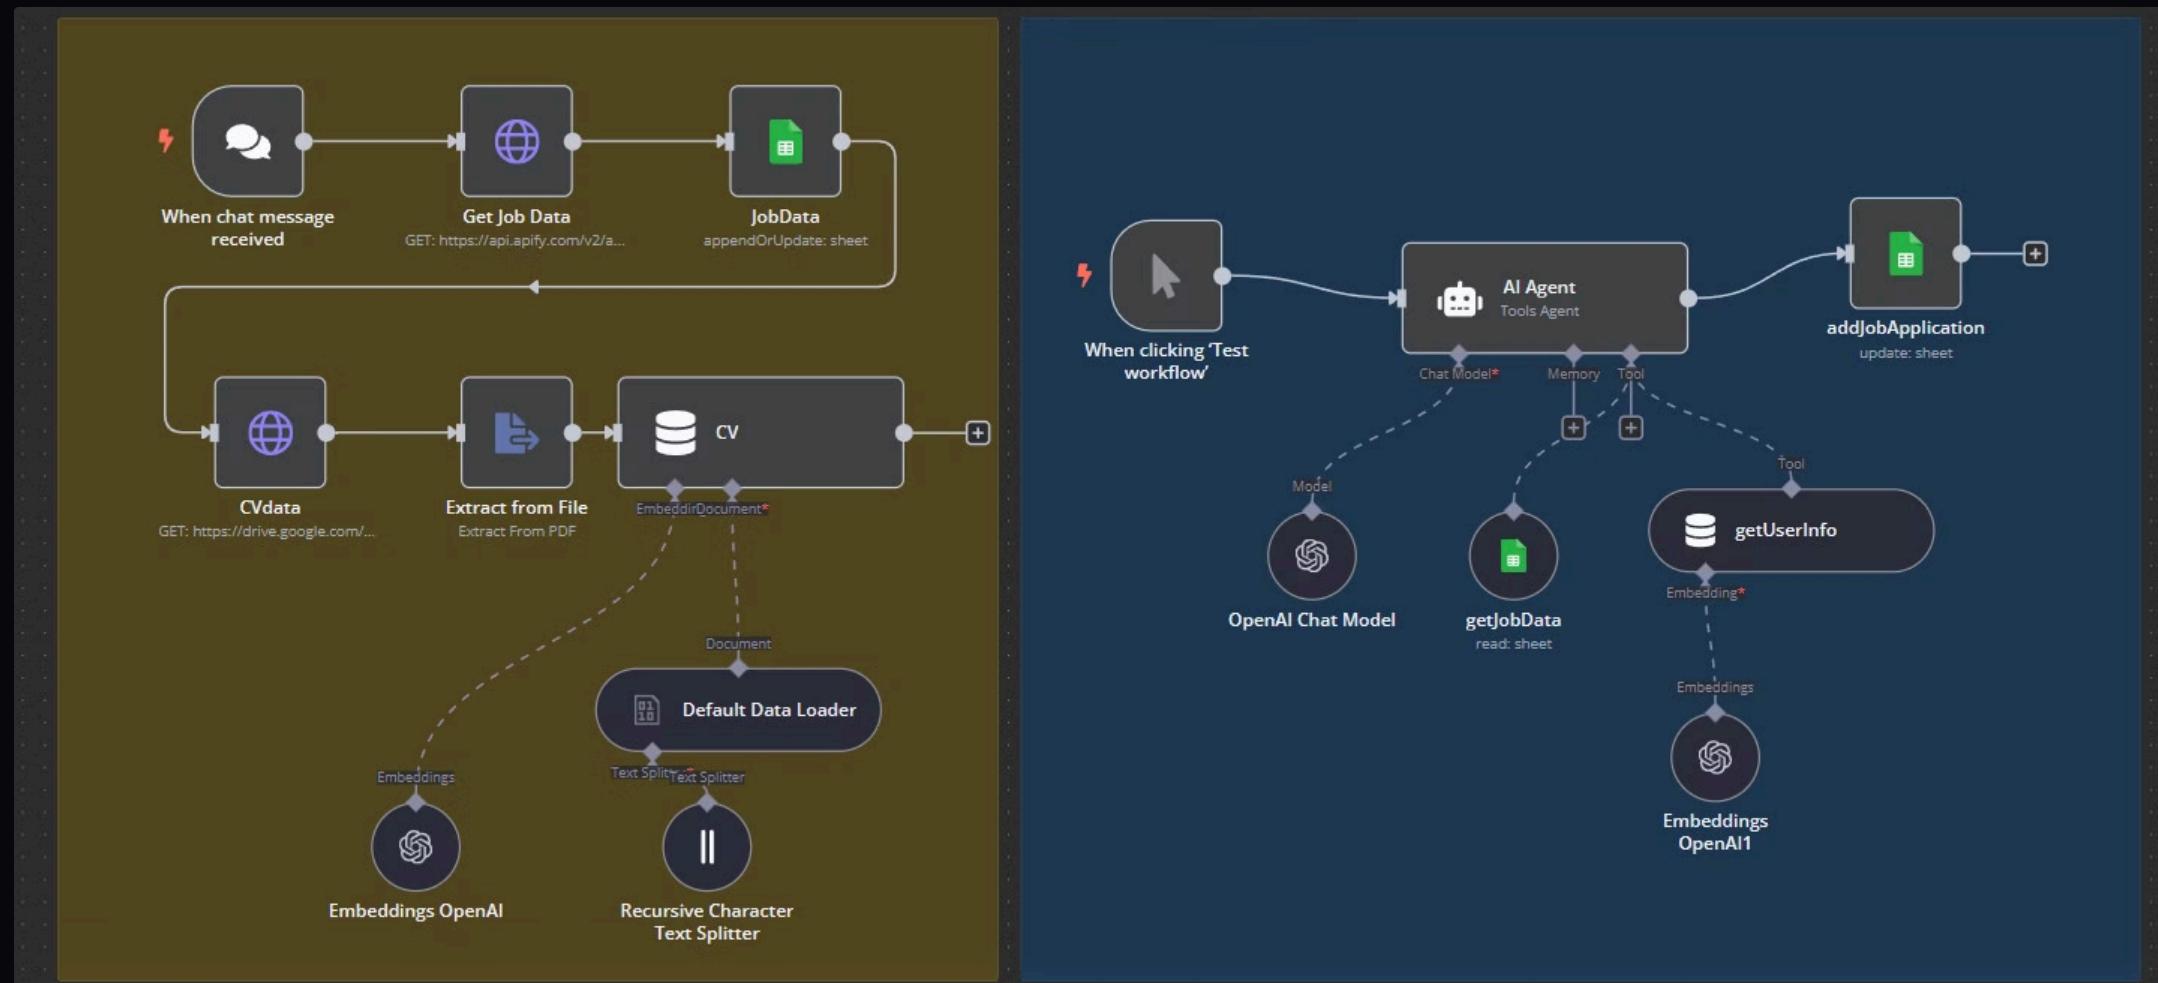

Voice calling agent - Cutco Corp

Customer service voice calling agent developed that answers the customers queries, books appointments and sends emails, sends sms, stores users information and daily and individual call analytics

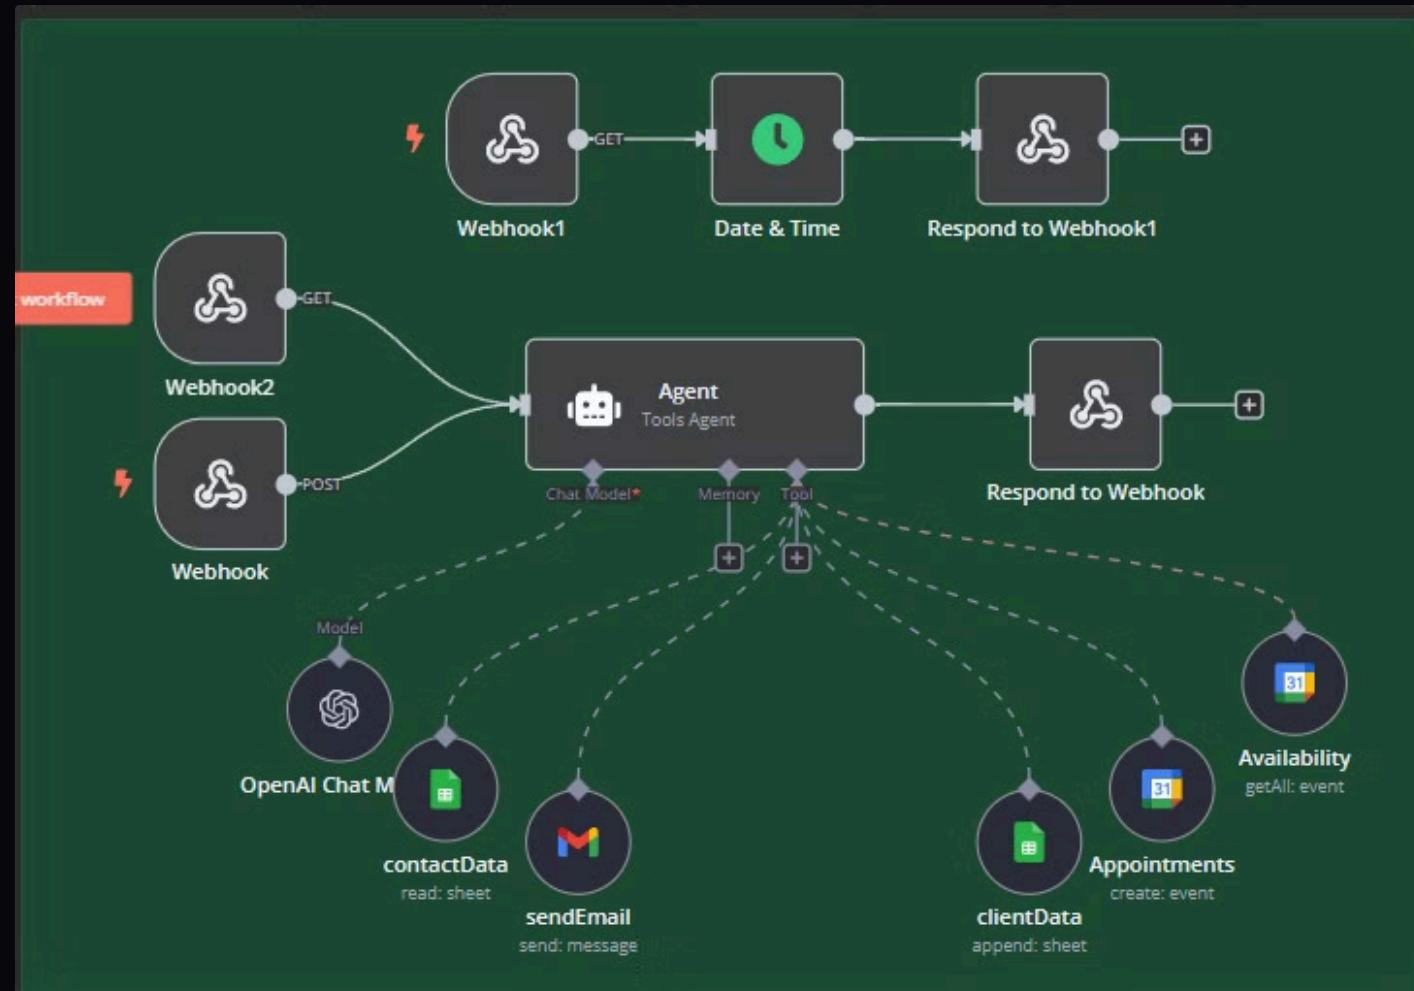

Job Automation

1. **Automated Job scraping:** Scrapes job postings from **LinkedIn, Indeed, Glassdoor, Google, ZipRecruiter, Bayt & Naukri** concurrently.
2. **Job Application based on skills of the user:** Automated job application creation based on provided user CV through Retrieval Augmented Generation.
3. Sample: <https://docs.google.com/spreadsheets/d/1pXaNiBe2Q1NFBrfd2-T-LnPsP0qhfY-p1B-Hsql-WU8/edit?usp=sharing>

AI calling agent - Customer service and sales and marketing

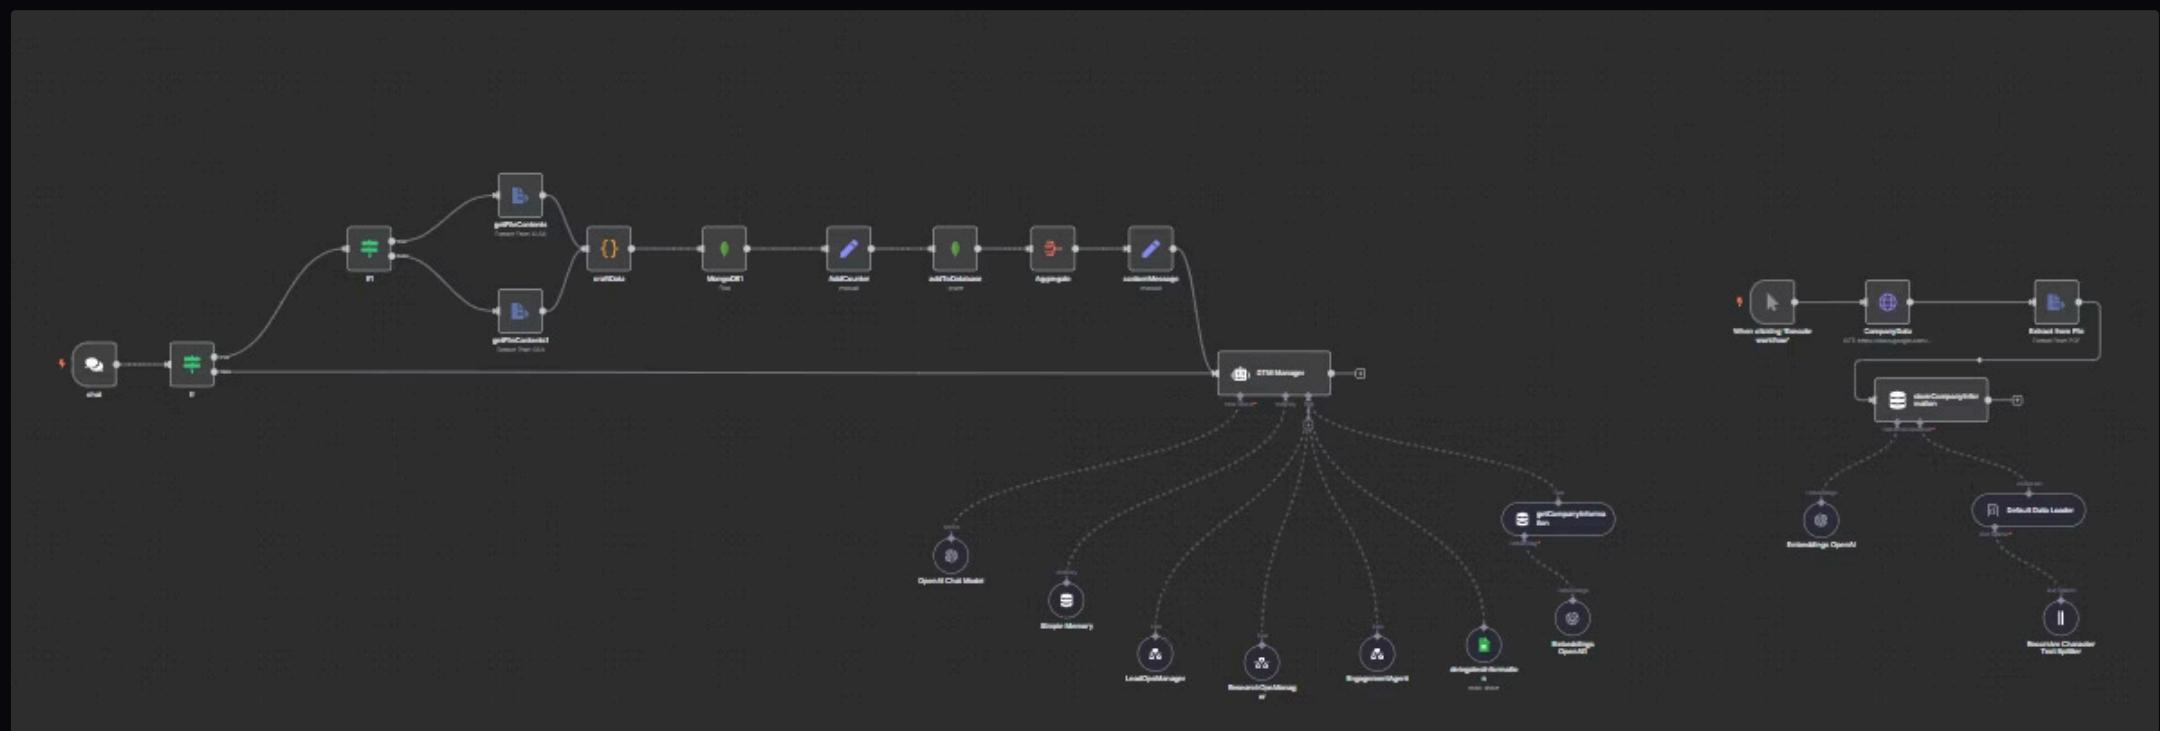

1. Send Emails to company staff based on user request
2. Book appointments for users, and create a customer database
3. Can persuade to buy services for the company
4. Voice cloning
5. Multi lingual (supports up-to 30 different languages)
6. Demo : <https://tellavision.netlify.app/>

Marketing AI expert | All IN ONE Market Agent

This AI agent has multiple delegates Leads, Research, Outreach , can handle multiple Lead Operation Task like lead generation, enrichment, competitive analysis, research and trend analysis, email and voice calling outreach

Below is a glance

Adventure Generator ChatBot

1. Adventure generation based on user narratives with long term memory retention capability.
2. Finetuned llama-3.2 3B model to improve the model's efficacy in generating story narrative
3. Created a long-term memory retention chatbot by exploiting RAG using LangGraph, and FAISS etc and a basic UI using streamlit

Link:<https://advenai.streamlit.app/>

The screenshot shows the main landing page of the AI Story Adventure application. At the top, there is a title "AI Story Adventure" with a game controller icon. Below the title, a subtitle reads "Embark on an epic interactive storytelling journey". A section titled "Choose Your Adventure" contains six colored boxes representing different genres: Fantasy (purple), Sci-Fi (blue), Horror (red), Cyberpunk (orange), Western (brown), and Mystery (teal). Each genre box has a title, a brief description, and a "Choose Setting" button. The "Fantasy" box is currently highlighted. The interface is dark-themed with light-colored text and buttons.

The screenshot shows a session of the AI Story Adventure application. On the left, a sidebar labeled "Current Setting" shows "Fantasy" selected. The main area features the "AI Story Adventure" title and a subtitle "Embark on an epic interactive storytelling journey". A narrative box displays the following text: "You find yourself in the middle of a dense forest, surrounded by towering trees that block out most of the sunlight. A faint mist lingers in the air, and the only sound is the soft rustling of leaves in the gentle breeze. Suddenly, a figure emerges from the fog - an old man with a long white beard and piercing blue eyes. He introduces himself as Eryndor, a wise wizard who has been watching you from afar." Below this, two panels are visible: "Available Actions" (Talk to Eryndor about your presence in the forest, Ask Eryndor about the strange mist surrounding you, Head into the forest, away from Eryndor) and "CURRENT STATUS" (Location: Unnamed Forest, Health: Healthy, Gold: 0). Subsequent sections show interactions with Eryndor, including his response to being asked about the mist and his explanation of being a nexus of ancient power. The interface includes a "Custom Action" section at the bottom where users can type their own actions and a "Take Custom Action" button.

ReseAI-Chat bot for Research Assistance

A simple research agent to assist in skimming large articles, it works by taking some links of articles scraping them and making a RAG vector store out of it, so that whenever the user asks any specific question, the agent can easily answer based on the provided context.

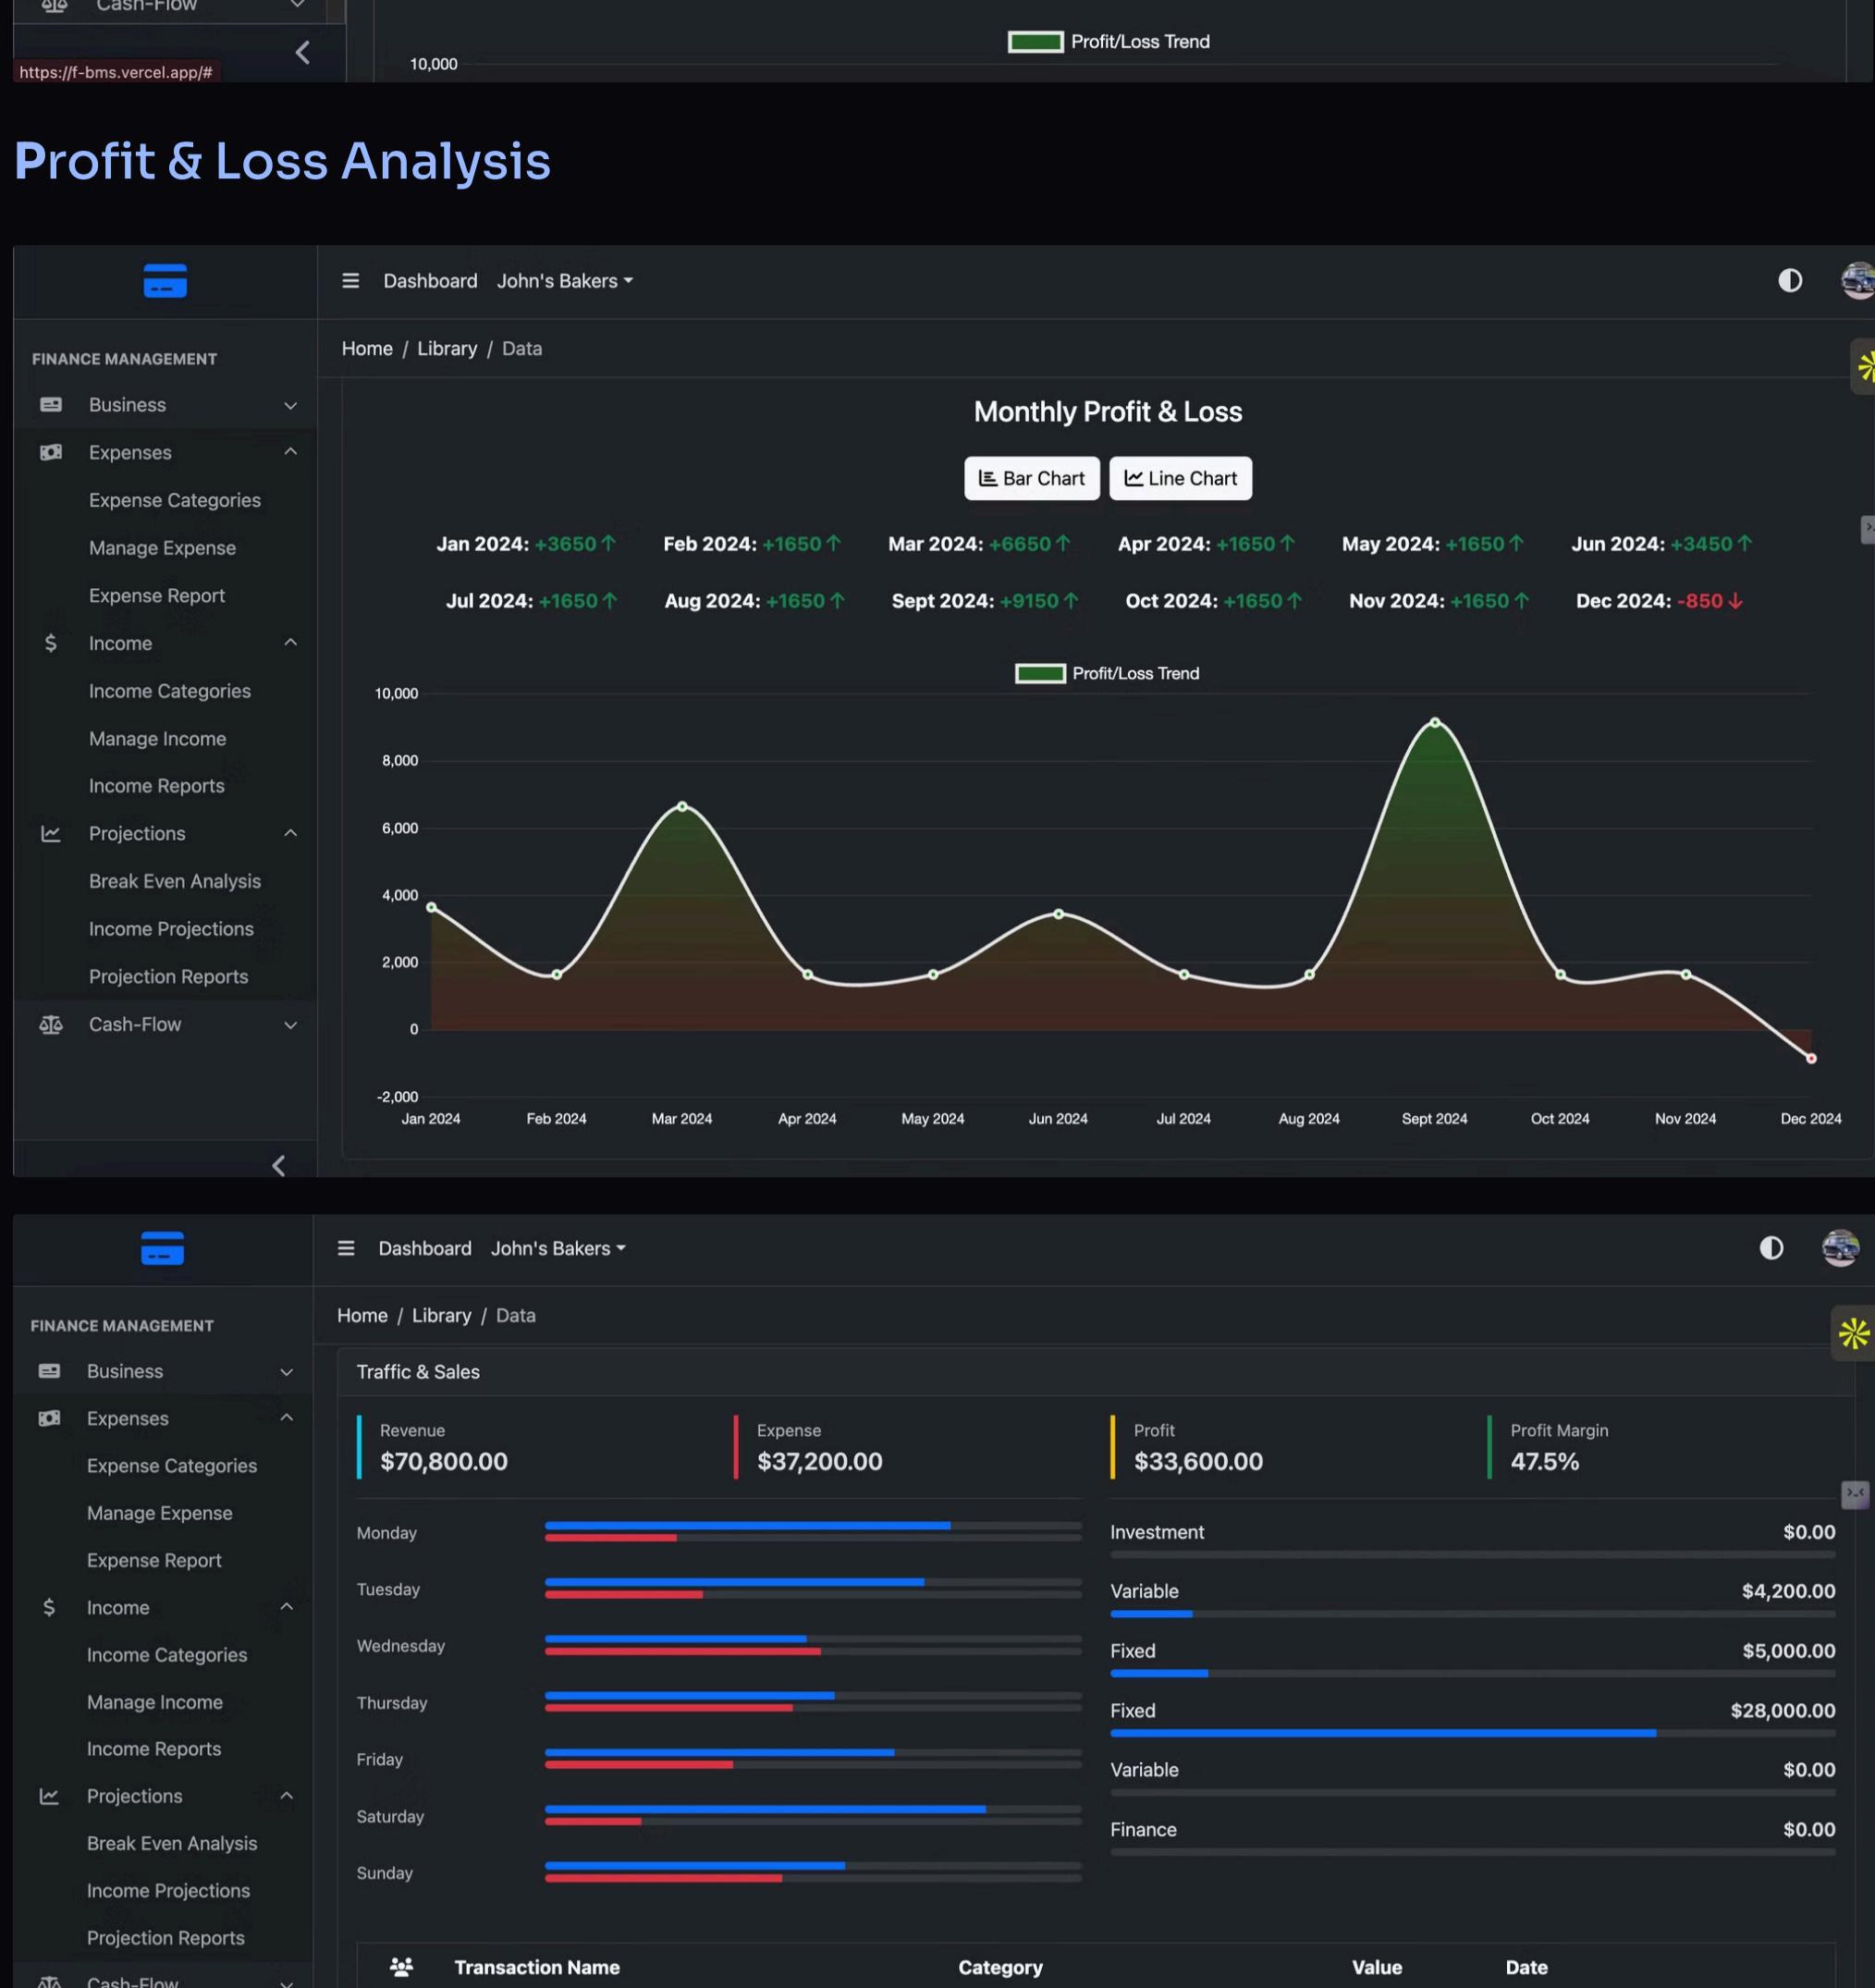

Link: <https://research-article-explorer-generative-ai.streamlit.app/>

The screenshot shows a Streamlit application titled "Research Article Explorer Generative Artificial Intelligence". On the left sidebar, there is a section for "Article URLs" with three entries: "URL 1" (https://www.britannica.com/topic/sapphi), "URL 2" (https://en.wikipedia.org/wiki/Sapphire#), and "URL 3" (https://www.ablogtowatch.com/hands-c). Below these are buttons for "Add URL" and "Process URLs". The main area has a title "Research Article Explorer Generative Artificial Intelligence" and a "Question:" input field containing "tell me about sapphire". The response section is titled "Answer" and includes the following text: "I don't know what specific information you're looking for about sapphires, but I can provide a general overview based on the provided texts." It then provides a general overview of sapphires, mentioning their properties, traditional gift status, and historical significance. It also notes their current production center in Madagascar. A final message encourages users to provide more specific questions. At the bottom, there is a "Sources:" section with a link to the Wikipedia page: <https://en.wikipedia.org/wiki/Sapphire#:~:text=Sapphire%20is%20one%20of%20the,of%20sapphire%20is%20called%20padparadscha>.

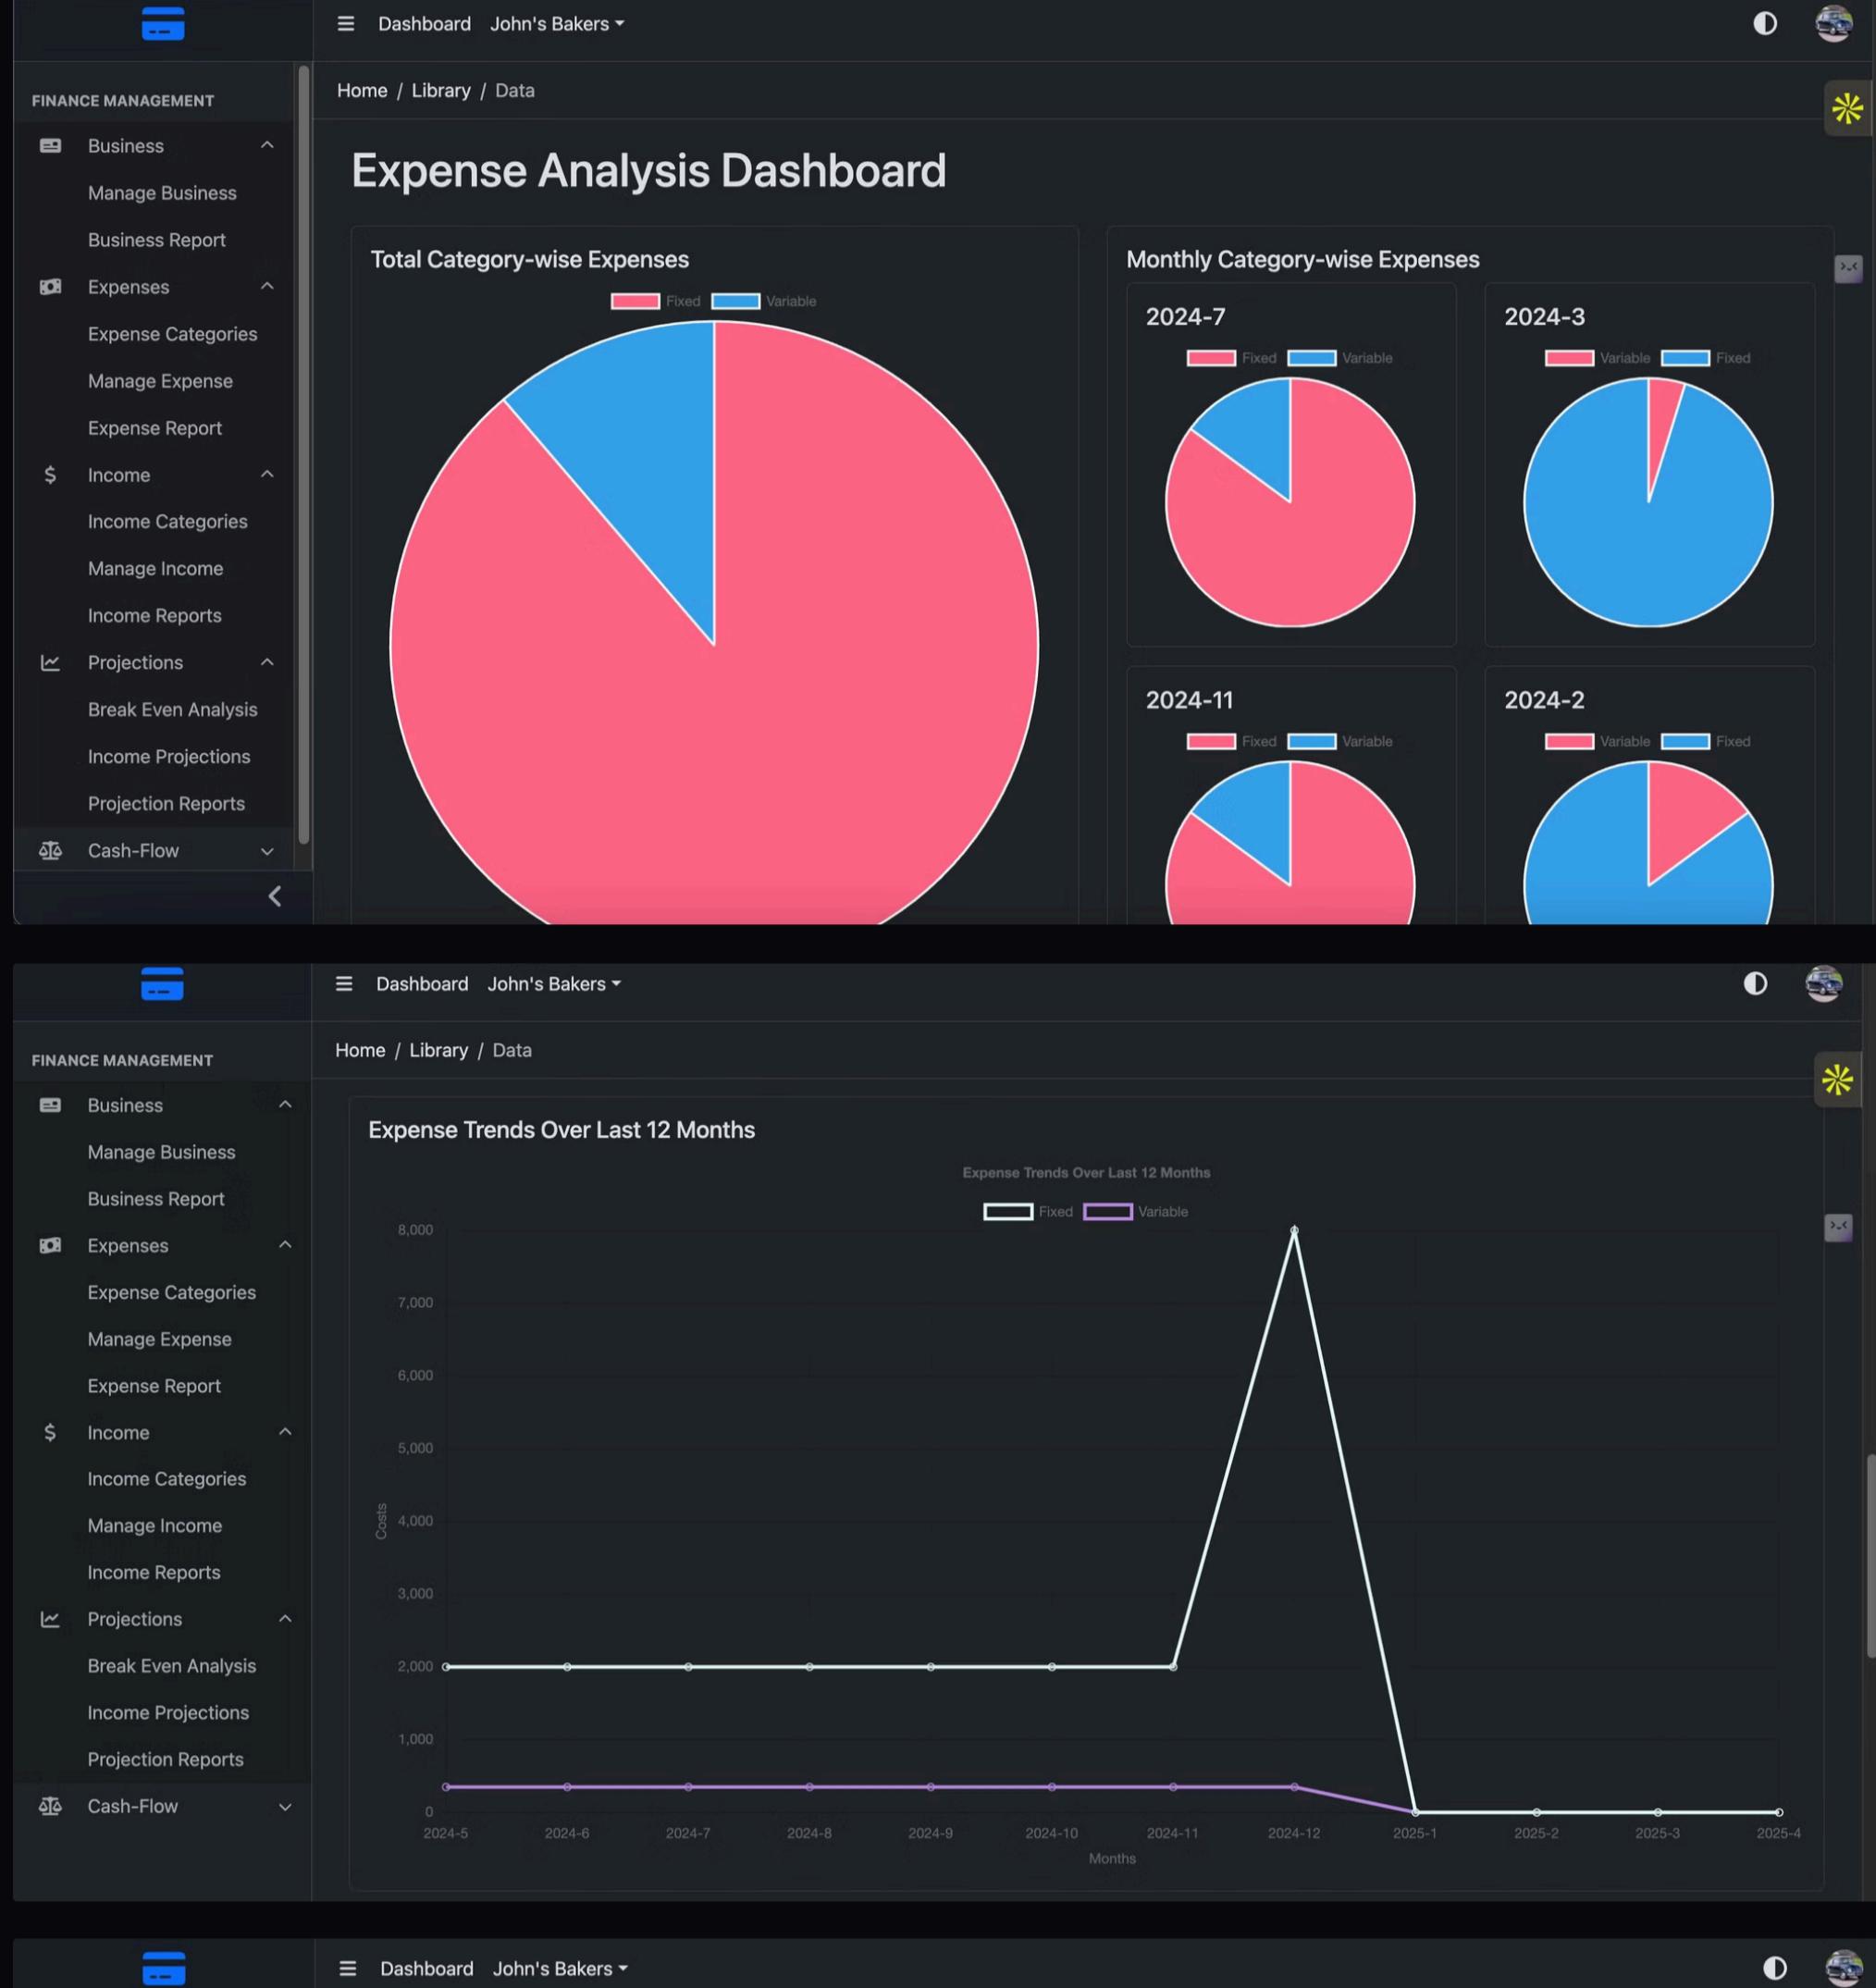

Business Financial Management and Automation System

- Provides automated profit, loss, and business report creation.
- Provides automated projection calculation such as Break even, and automated cashflow document generation.
- Provides extensive dashboard with detail analytics and statistics of income and expense with a regression model to predict future income or expense trend.

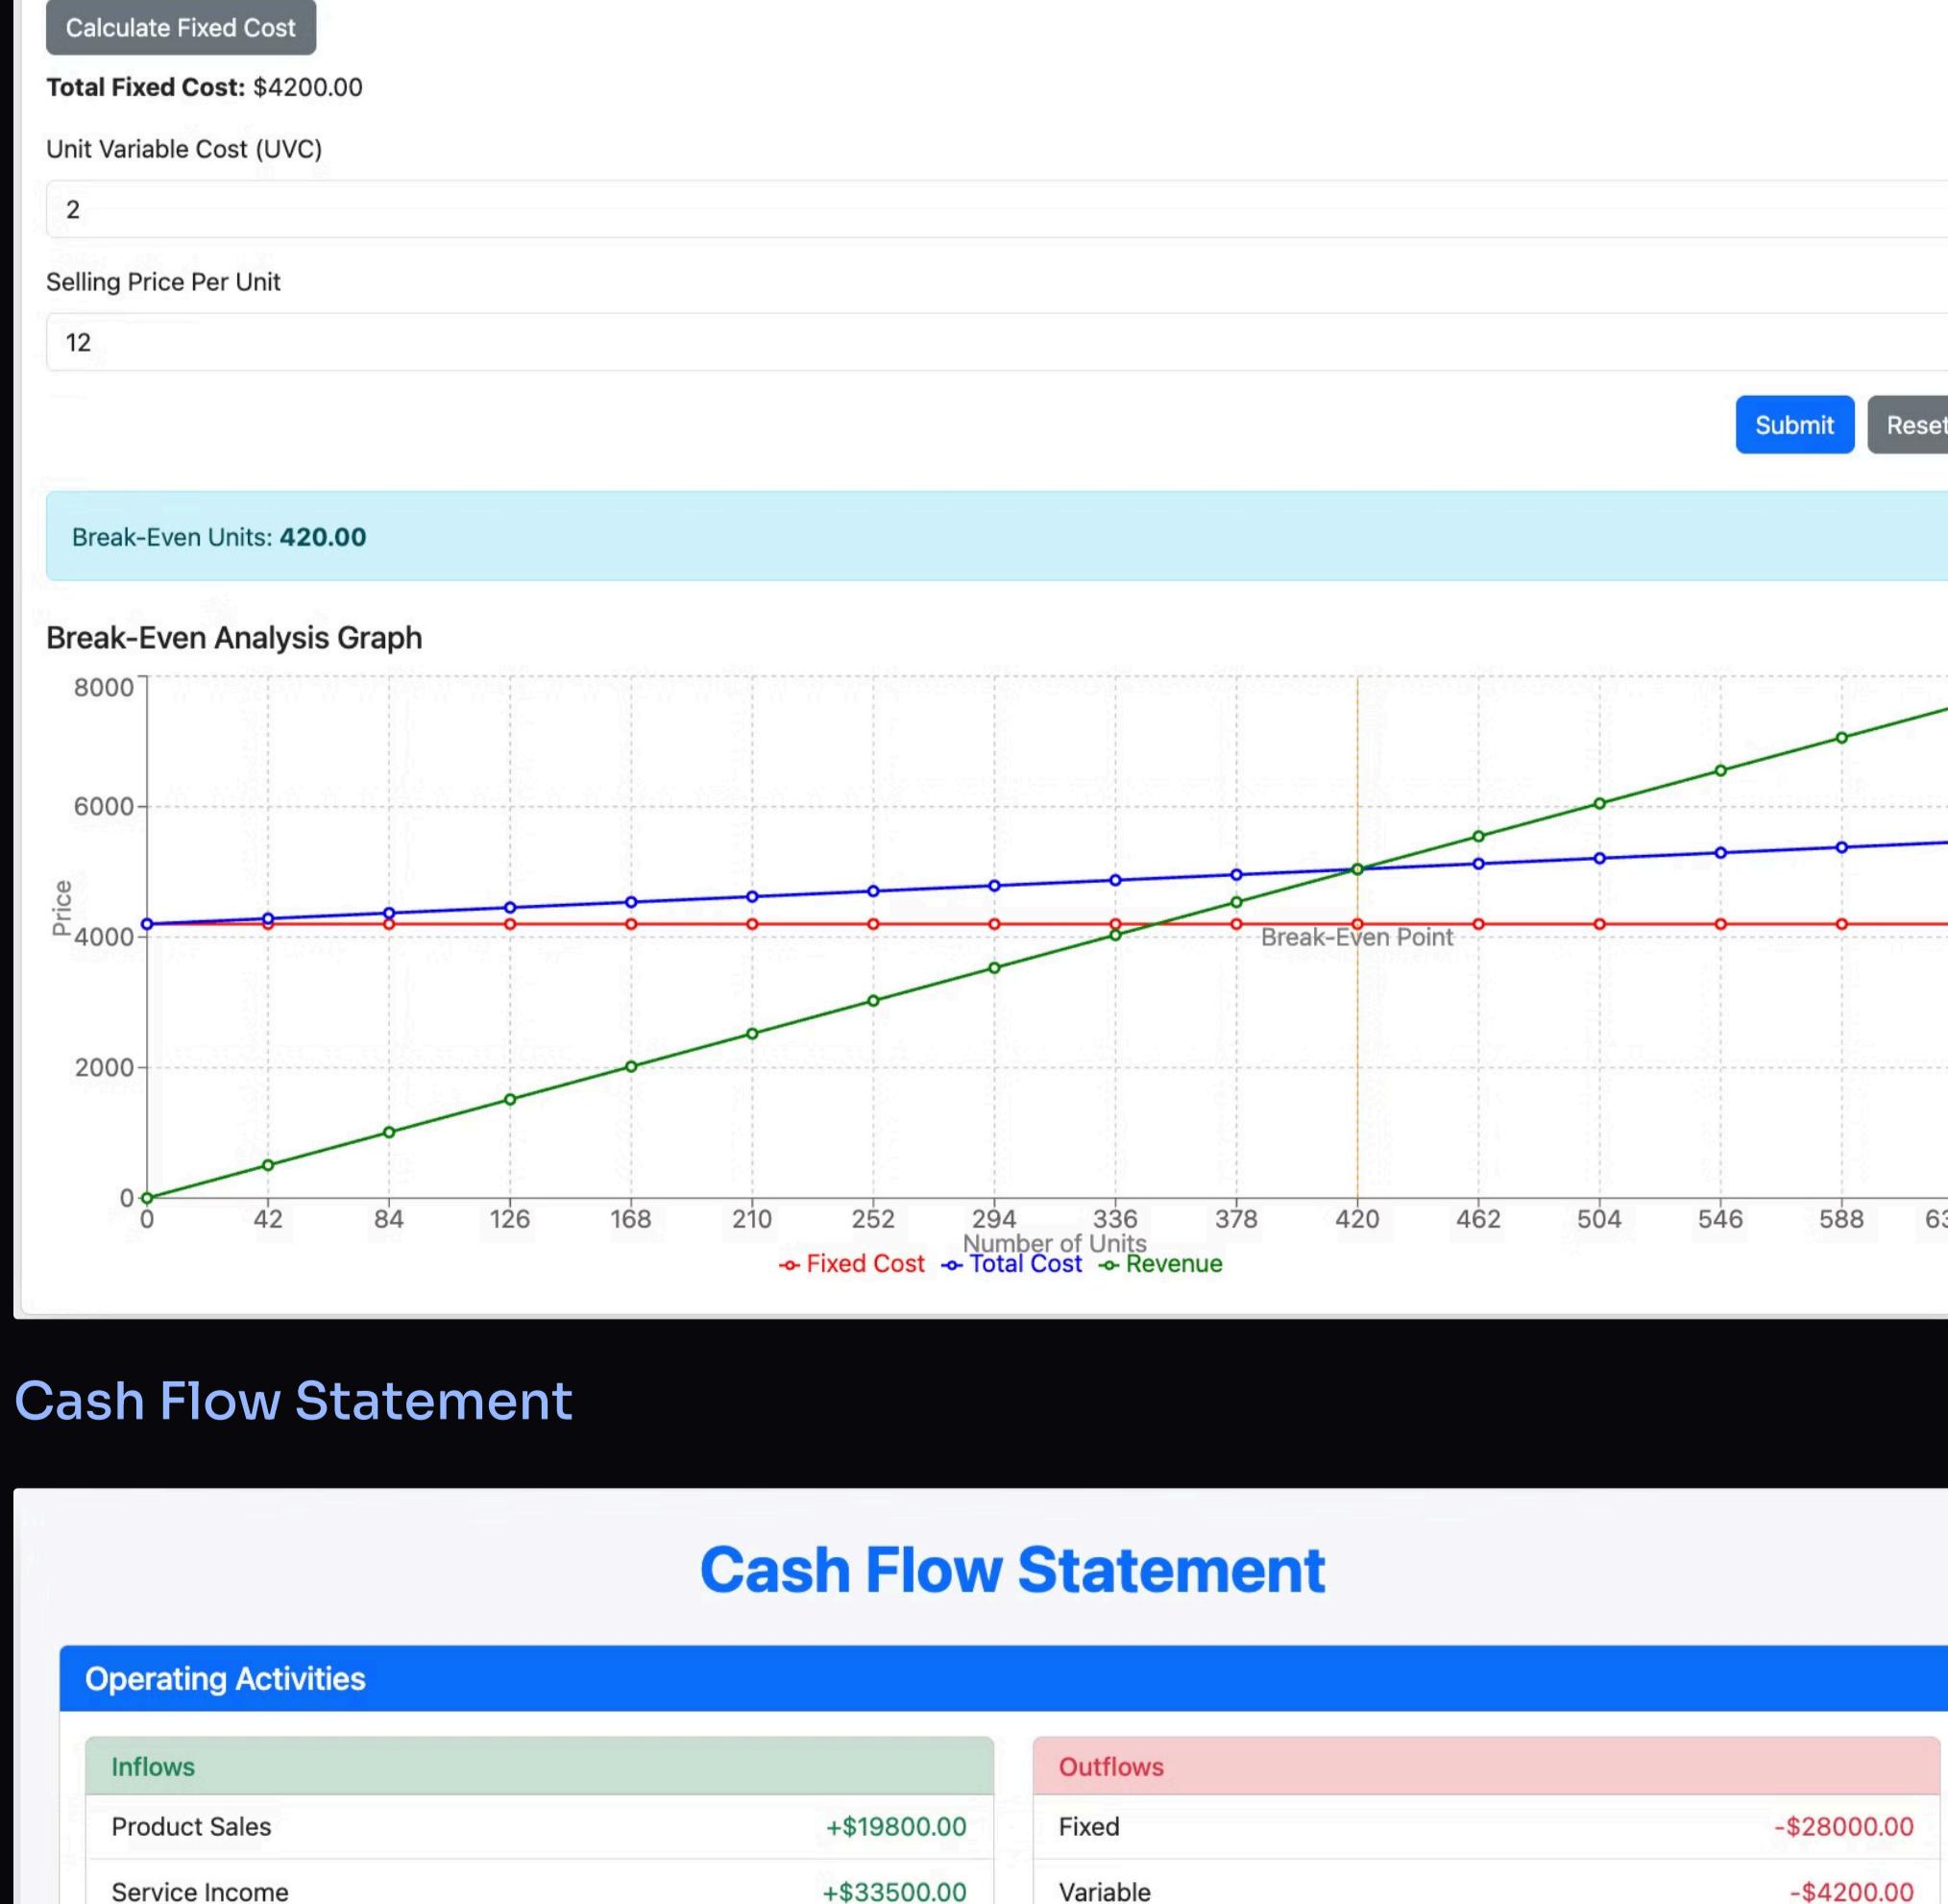

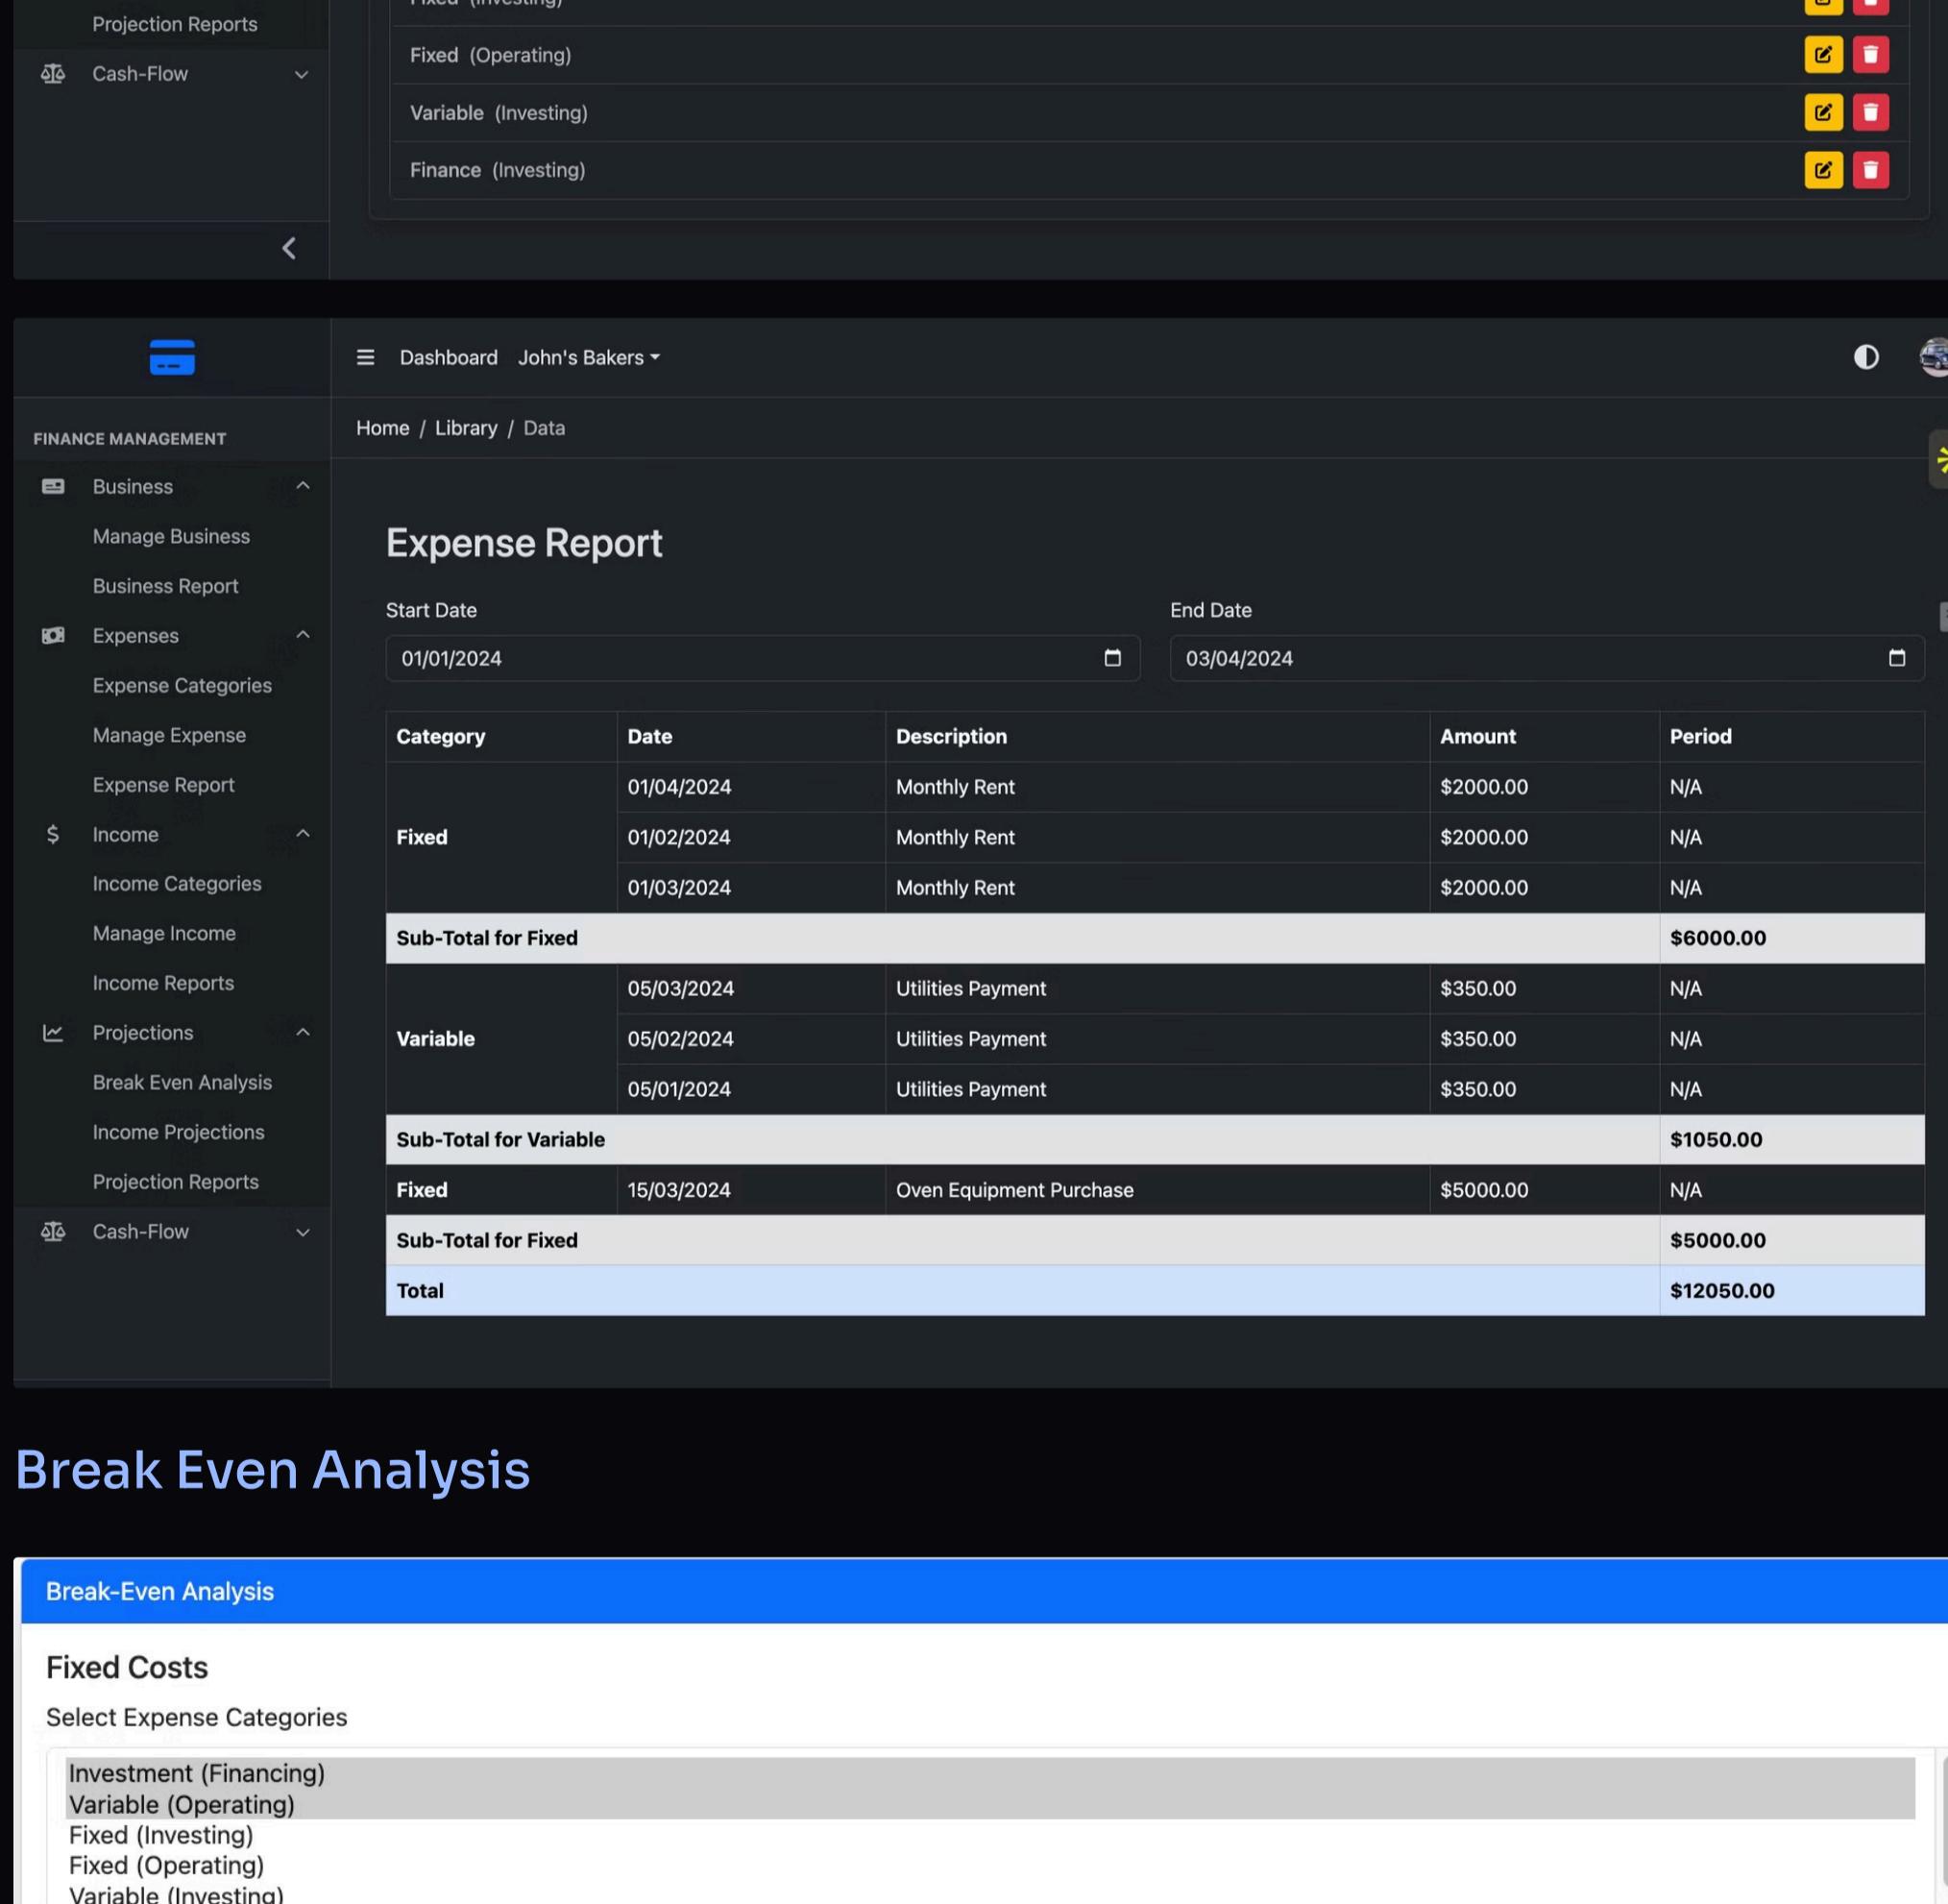

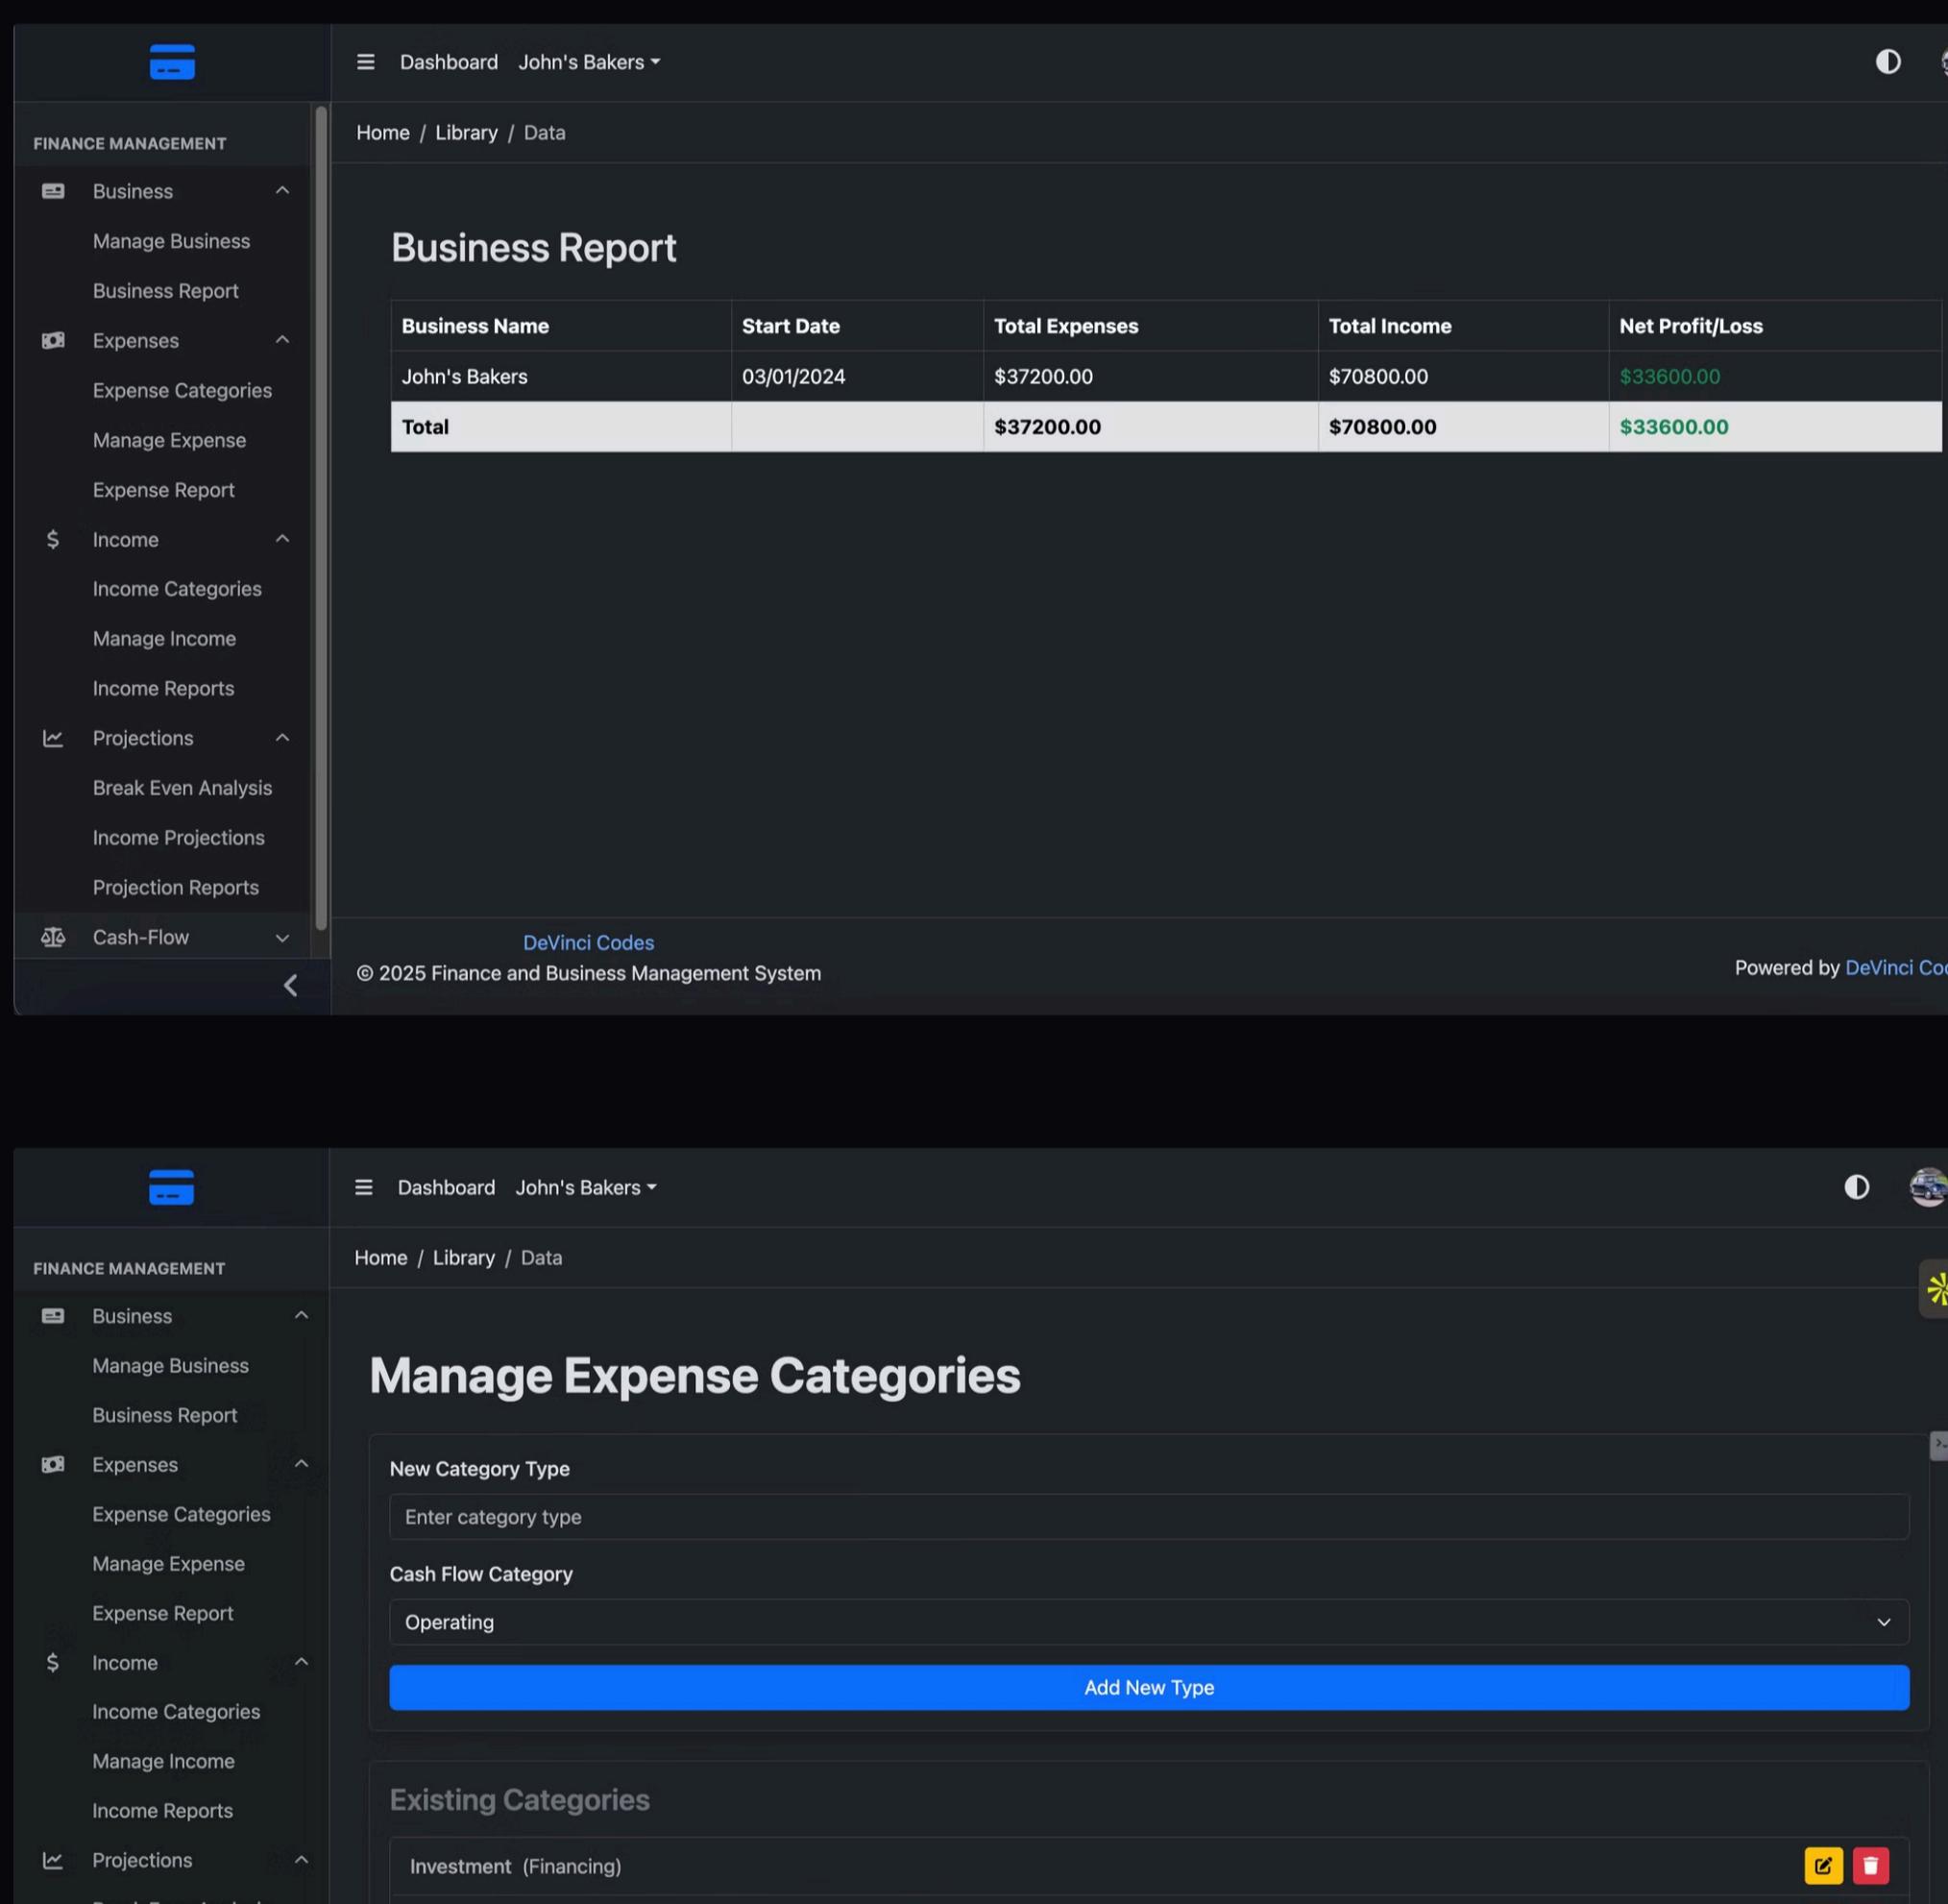

Link: <https://f-bms.vercel.app/>

Profit & Loss Analysis

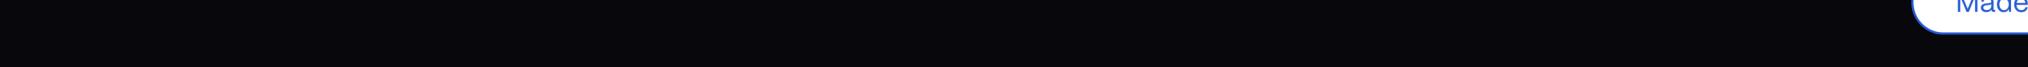

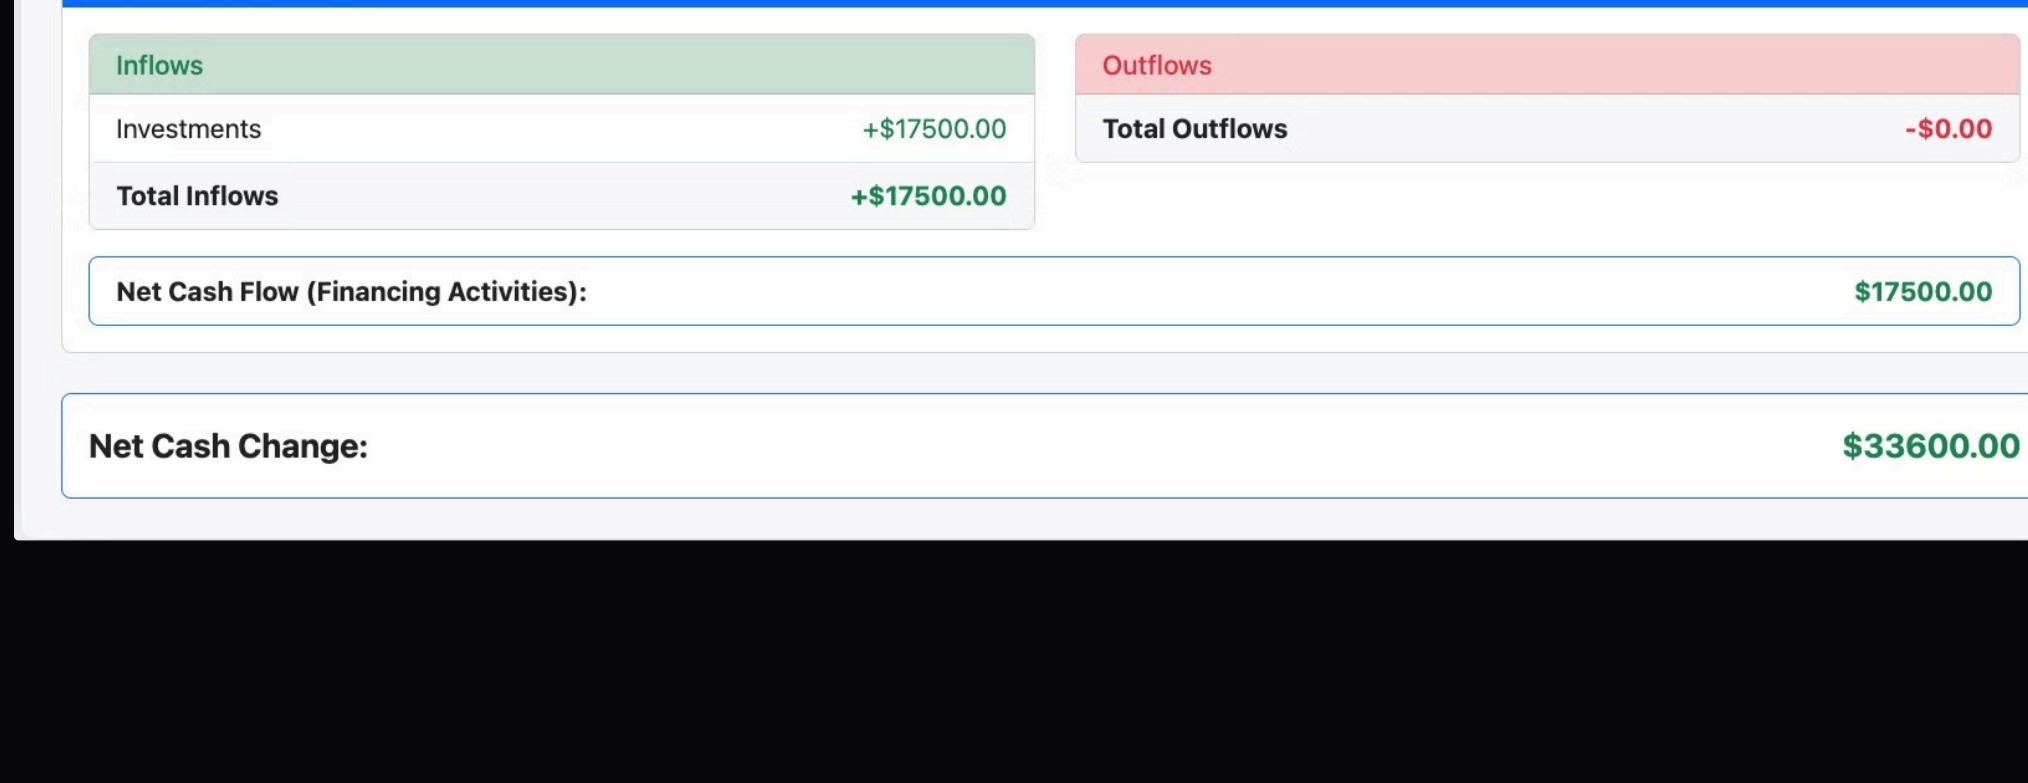

After clicking on the expense we get to see a detailed analysis dashboard.

Similar Analysis is there for the income also.

Why choose us?

We help you save paying your rent or mortgage while travelling for longer so you can enjoy a new city without the cost of expensive accommodations. We offer stacks more value and flexibility than existing providers. No booking-hidden fees. One flat annual fees of \$204 AUD which is less than one week rent in Australia. List up to 5 properties and rent or swap your home with trusted community within the platform.

What are users saying?

Hear feedback from users who have tried and tested the platform.

Excellent  5.0 out of 5 based on 2,220 reviews 

"Easy to sign up and list the place."

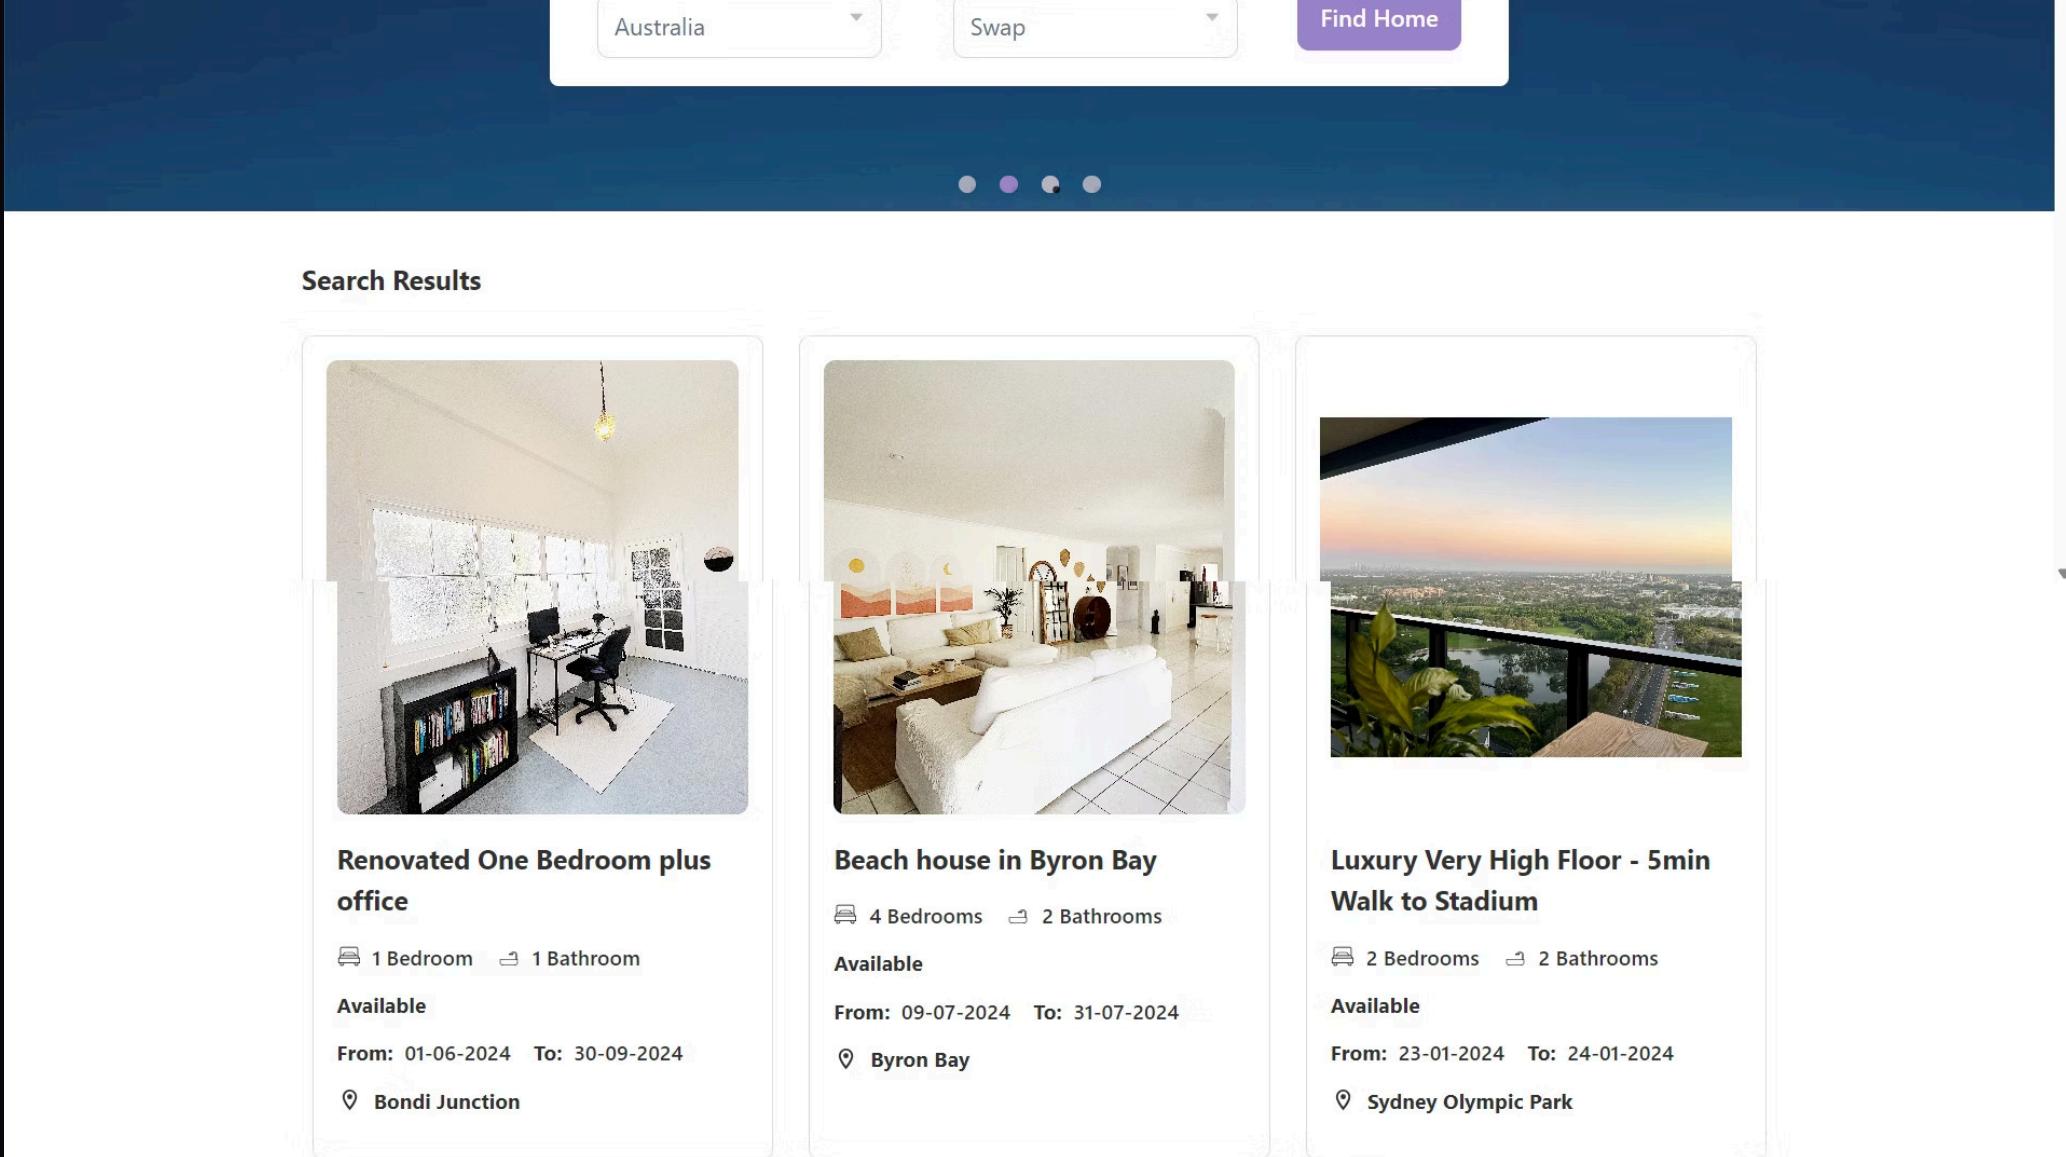

Scott Beattie
DIGITAL NOMAD

"Efficient and reliable platform."

Mark Thompson
PRODUCT MANAGER

"Smooth process from start to finish."

Rebecca Jarrett-Dalton
TRAVELLING ARTIST

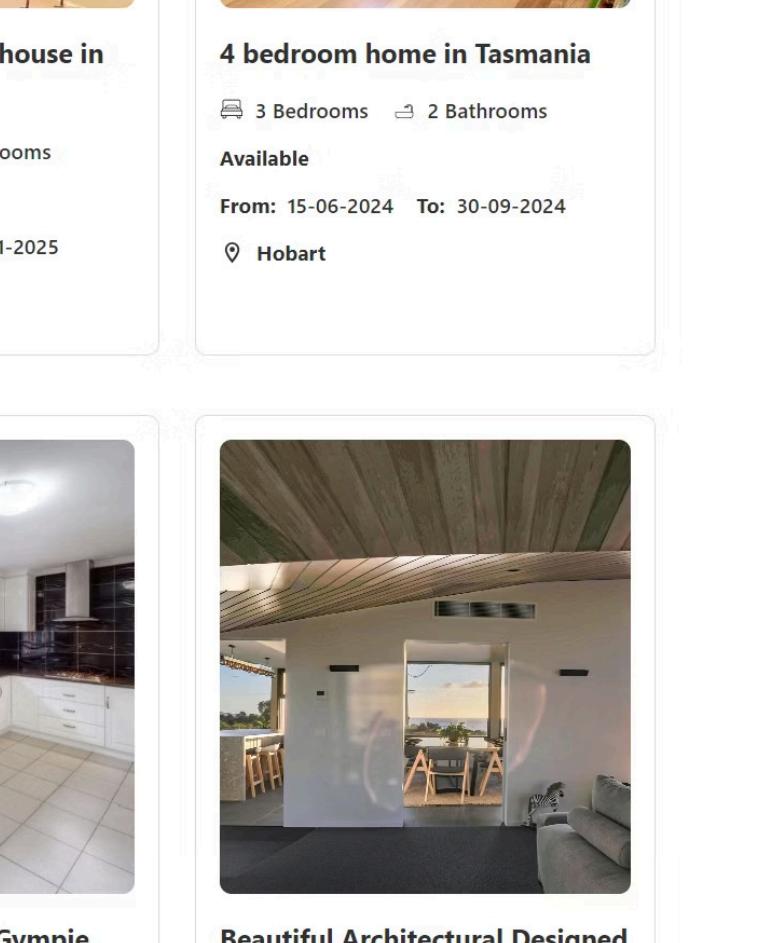

Sustainability
We are committed to promoting sustainable travel and reducing our impact on the environment.

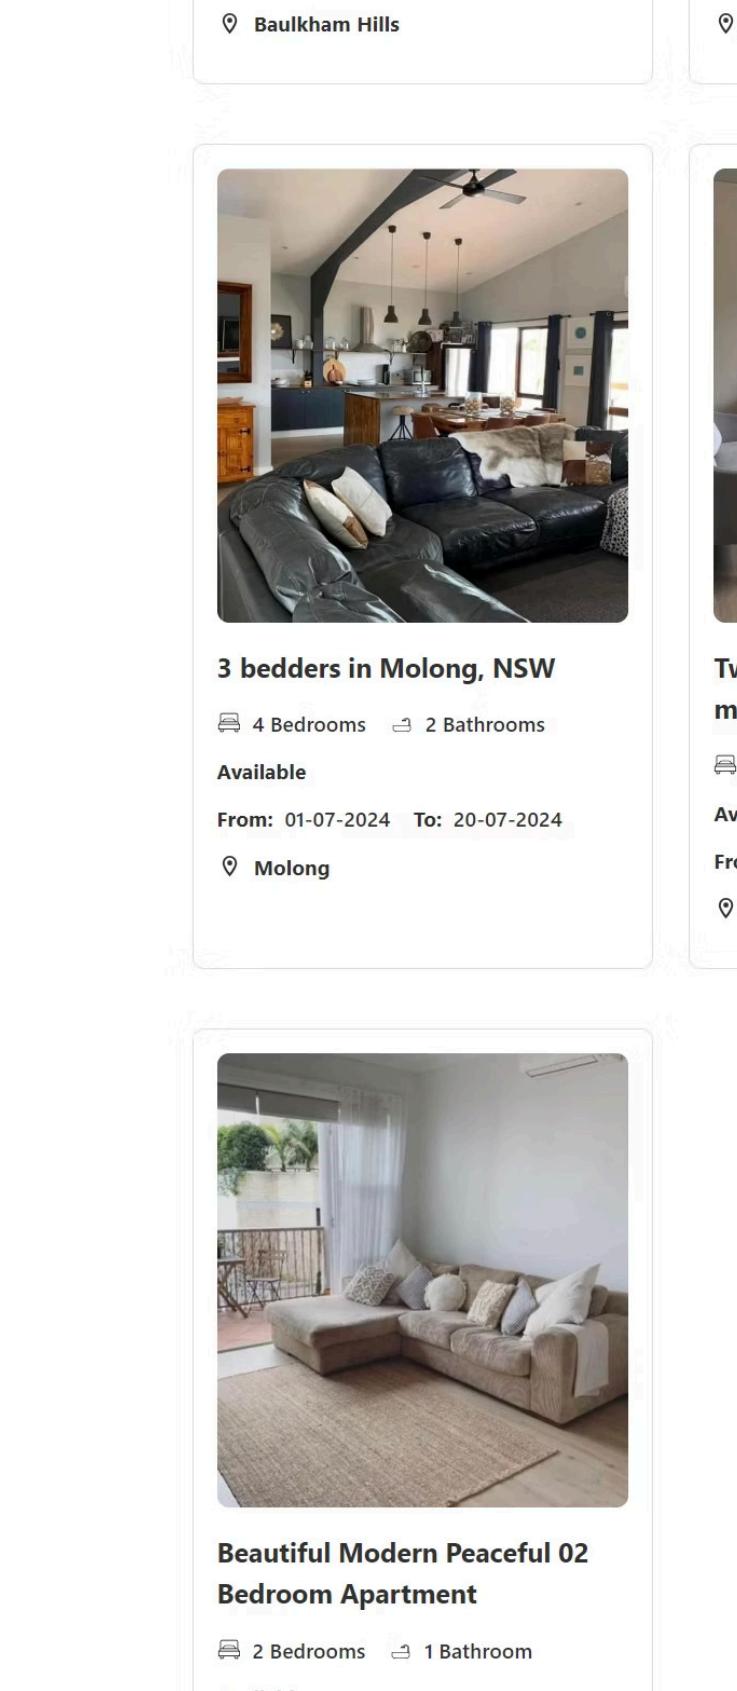

Freedom
We provide affordable and flexible travel options for everyone to explore the world on their own terms.

Comfort
We provide high-quality and comfortable accommodation options that make travel easy and enjoyable.

Our Platform

City Swap is a home swapping and subleasing membership based platform targeted towards remote workers and slow travellers. We help match quality tenants with quality places around the world. Our platform simplifies the process of connecting travellers, renters, and remote workers from across the globe. We facilitate property exchanges and serve as a hub for individuals looking to either swap their homes or find ideal properties for subleasing.

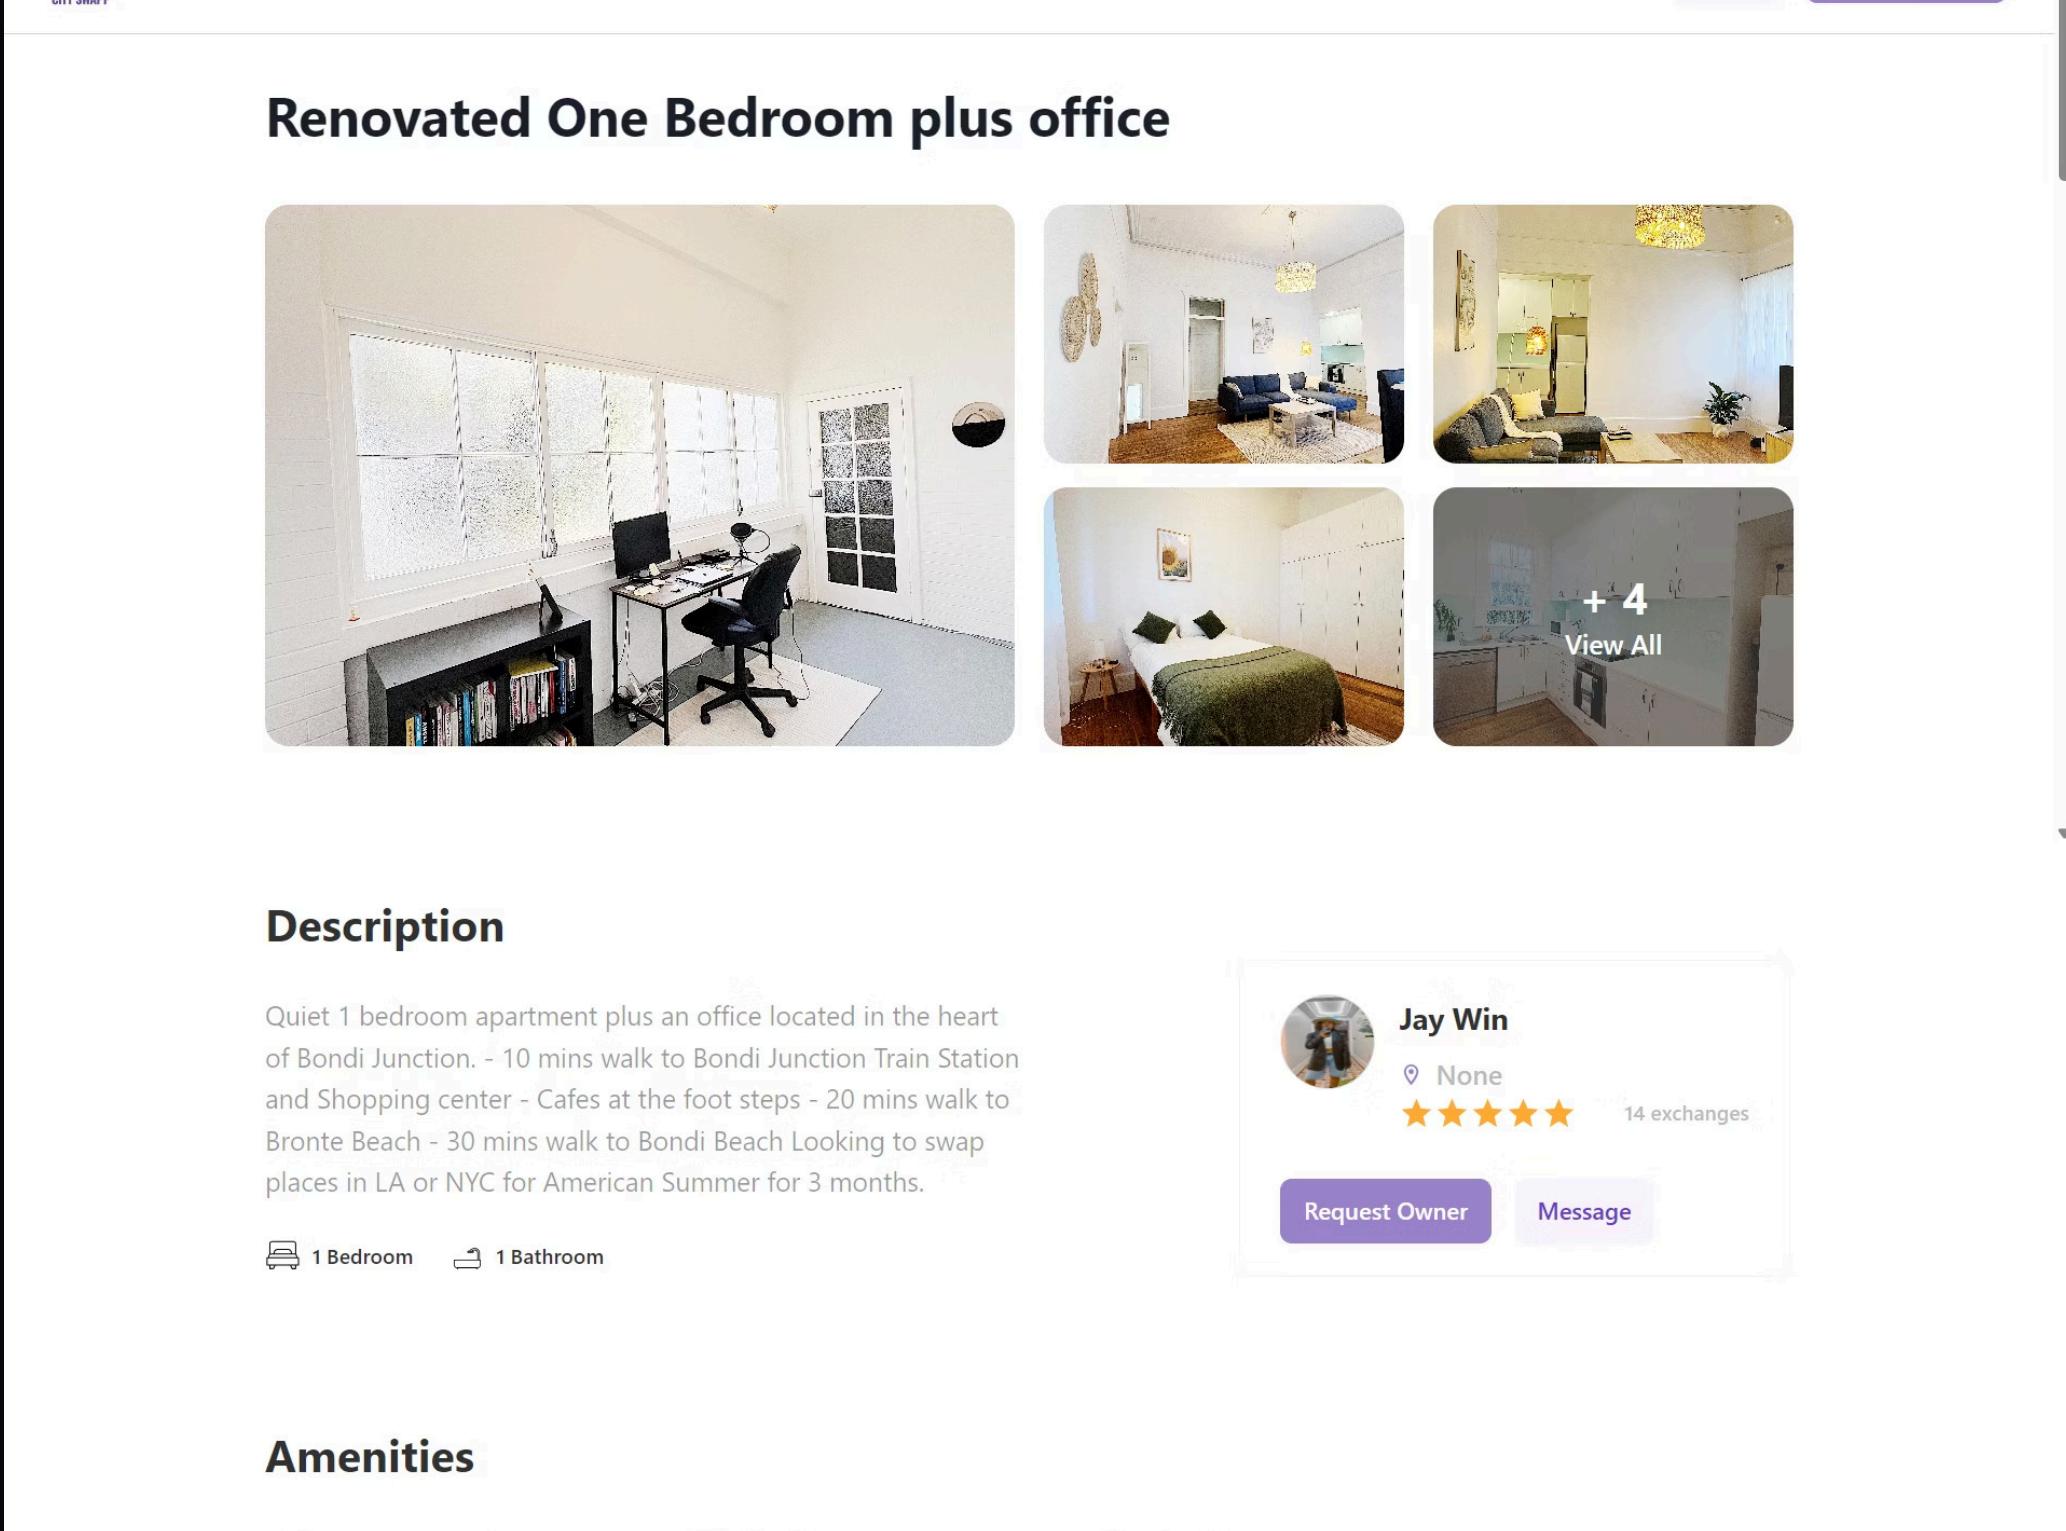

Community you'll adore

We believe that travel is about more than just seeing new places - it's about building connections and forming a global community. We are committed to fostering a sense of community among our members and creating opportunities for people to connect and share their love of travel.

Ashjar - ReactNative Mobile Application

(Seasonal Partner Sheikh Mohid Yousaf)

1. Co-working space management for Ashjar.

Link: <https://apps.apple.com/pk/app/ashjar-space/id6476087387>

This section compares the Ashjar web dashboard with the mobile application. On the left, the "Ashjar(Web) Dashboard & Tools Uses" is shown, featuring a sidebar with options like Branches, Workshops, Requests, Rooms, Workspaces, Nurseries, Users, Coupons, Announcement, and Information. The main area displays performance metrics (Revenue: SAR 15M, Seats: 3225, Workshops: 60, Retention Rate: 300%), a bar chart of total revenue by month, and a table of latest bookings. On the right, the mobile application's login screen is shown, featuring the Ashjar logo, input fields for Email Address and Password, and a "Submit" button. Below the mobile screen, there are three icons representing React Native, MongoDB, and AWS.

Ashjar-Space (App Development)

This section shows the development process for the Ashjar-Space app. It includes a wireframe of the sign-up screen, a screenshot of the sign-up screen with fields for name, birthday, gender, and role, and a screenshot of the app's interface showing a map of locations and booking details for chairs, rooms, and workshops. At the bottom, it says "2024 DeVinci Codes. All rights reserved.".

This section shows the final version of the Ashjar-space mobile application. It includes a header with the "Ashjar-space" logo and various developer logos (React Native, mongoDB, AWS, Node.js, Jira Software). Below are five screenshots of the app's interface: 1. A listing of workspaces with photos and prices (e.g., Hydrangea at 103.50 SAR / hr). 2. A listing of workshops with tools and prices (e.g., 67.50 SAR / chair). 3. A date selection calendar for booking. 4. A map showing branch locations in Saudi Arabia and Kuwait. 5. A "My Account" screen showing user information, notifications, and account settings. At the bottom, it says "2024 DeVinci Codes. All rights reserved." and "Made with GAMMA".

A map of Lahore with major roads L-20, M2, M3, AH1, and H-1. Key landmarks include Jhuggian Jodha, Begampura, Askari Villas, Gulberg, Al Noor Town, Johar Town, Bagrian Dharam Chand, Chung, IZMIR TOWN, Canal Gardens, Sharaqpur, Kot Abdul Malik, Lahore Garden, Ferowala, Nai Abadi, Thatta Tularan, Attari, and Cheleka.

The top navigation bar includes icons for a profile picture, a padlock labeled "Shop", a person labeled "Services", a phone labeled "Forum", and a blog icon. To the right, there's a sidebar titled "For Pets, For Love All in One Place!" with a "Get Started" button. Below it, there's a "Services" section with a "Cat Specialist" and "Dog Specialist" card. A "Featured Pet Sitters" section shows a grid of cards for different services like "PET SITTING CARE SERVICES" and "PET SITTING 24/7 SERVICE". At the bottom, there's a "Become a Pet Sitter" form with fields for location, hourly rate, experience level, availability, and upload profile image.
